Summary

Senior Software Engineer with **8 years** of experience building scalable backend systems and data platforms across healthcare education, cloud marketplace, and developer tooling domains. Led cross-functional teams of 5+ members to design and deliver production systems processing 100,000+ daily requests. Served on-call rotations and owned services end-to-end from kernel level to user-facing APIs. Reduced infrastructure costs by 30% through optimization at Tackle.io. Currently Works on distributed systems and platform engineering in high-growth SaaS environments. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, JavaScript, Node.js, TypeScript, FastAPI, Django, HTML, CSS

Infrastructure & Cloud: AWS, Docker, Kubernetes, Terraform, CI/CD, Helm

Data & Storage: PostgreSQL, Redis, Elasticsearch, Kafka

Platform Engineering: RESTful APIs, microservices, OAuth2, distributed systems

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected cloud marketplace platform serving 50+ ISV partners across **AWS**, **Salesforce**, and **Azure**, enabling software vendors to automate listing and billing workflows end-to-end.
- Built **Python**-based data pipelines processing 1M+ records daily with **Kafka** and **PostgreSQL**, reducing data latency from 4 hours to 15 minutes for customer reporting dashboards.
- Optimized **PostgreSQL** query performance through indexing strategies and query analysis, improving dashboard load times from 3.2s to 0.8s for 500+ concurrent users.
- Provisioned **AWS** infrastructure with **Terraform** modules for VPC, ECS, and RDS services, managing multi-account architecture for 3 environments with standardized security groups.
- Implemented observability stack using **Datadog** and **CloudWatch** for 20+ services, reducing mean time to detection from 12 minutes to 90 seconds through automated alerting.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Collaborated with product and design teams to define API specifications and data models for new marketplace features, reducing spec revision cycles by 50%.
- Built **backend services** with **Python** and **FastAPI** for marketplace listing management, integrating with **AWS** SDKs for product data synchronization across platforms.
- Created automated testing suite with **Pytest** and **Docker** containers, increasing code coverage from 45% to 82% across core business logic modules.
- Developed webhook processing system handling 10,000+ events per hour with **Redis** queue and retry logic, achieving 99.9% delivery reliability.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built student information system with **Django** and **Python** serving 25,000+ active learners, implementing role-based access control for compliance with FERPA regulations.
- Configured **AWS** infrastructure including EC2, RDS, and CloudFront CDN for learning management platform, improving page load times from 4s to 1.2s.
- Led migration of legacy PHP codebase to **Node.js** microservices architecture, enabling horizontal scaling during peak enrollment periods with zero downtime.

- Designed **RESTful APIs** for course content delivery and enrollment processing, handling 5,000+ daily transactions with **PostgreSQL** backend.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed student enrollment and certification tracking modules with **Python** and **Django**, reducing manual processing time by 3 hours daily.
- Created reporting dashboard with **JavaScript** and **PostgreSQL** for student engagement analytics, providing insights for curriculum improvements.
- Maintained legacy systems and performed database migrations, ensuring data integrity across 8 years of student records.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed documentation and sample applications for PrizmDoc web viewer SDK, demonstrating document viewing and annotation integration with **JavaScript**.
- Built proof-of-concept integration using **Node.js** demonstrating SDK capabilities including OCR and document conversion for enterprise clients.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
