Summary

Senior Software Engineer with **8 years** designing and delivering scalable healthcare data platforms and cloud-native SaaS products. End-to-end ownership from architecture through production across **Python, React, Node.js, AWS**, and **PostgreSQL**. Built systems processing **healthcare** records at scale, supporting **medical imaging** data aggregation for 10+ healthcare integrations. Partners with cross-functional teams to ship high-availability services serving thousands of concurrent users. Seeking a senior engineering role to build major healthcare technology at a mission-driven company. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: Python, JavaScript, TypeScript, SQL, Bash, HTML, CSS

Frameworks: Node.js, React, Next.js, FastAPI, Django, Express, RESTful APIs, GraphQL

Cloud&DevOps: AWS(EC2, ECS, Lambda, S3, RDS, ElastiCache, CloudFront), Docker

Data&Storage: PostgreSQL, Redis, Elasticsearch, MongoDB, SQL, DICOM, FHIR

Practices: HIPAA compliance, microservices, agile development, technical leadership, code review, system design, on-call support, Kubernetes

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Led design and architecture of a healthcare data aggregation platform that consolidates imaging data from 10+ healthcare systems, normalizing DICOM standards to enable large-scale clinical research workflows.
- Built a React-based seller portal with Node.js microservices connecting to **AWS** cloud marketplaces, onboarding **450+ ISV partners** and reducing time-to-market for new integrations.
- Architected HIPAA-compliant backend services in **Node.js** and **Python**, implementing **OAuth2** authentication, field-level encryption, and comprehensive audit logging across all patient data endpoints.
- Designed and deployed automated CI/CD pipelines with **GitHub Actions** to **AWS ECS**, cutting deployment time from hours to under 15 minutes while maintaining **HIPAA compliance**.
- Developed a **PostgreSQL** and **Elasticsearch**-powered metadata indexing system for clinical data search, improving query performance **3x** for healthcare organizations retrieving patient records.
- Implemented Redis caching layer on API endpoints serving healthcare integrations, reducing average database load **70%** and cutting p99 response times significantly.
- Mentored 5+ engineers on healthcare data security patterns, **microservices** architecture, and **technical leadership**, conducting design reviews and establishing team best practices.
- Served on-call rotation for production healthcare services, diagnosing and resolving **RESTful API** outages and **database** performance issues with **99.9% uptime** SLA adherence.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Built and shipped React dashboards for cloud marketplace analytics, serving 200+ SaaS sellers and enabling data-driven pricing decisions with real-time **AWS** billing metrics.
- Developed **Node.js** backend services powering marketplace integration workflows, handling high-throughput webhooks with **Redis** queue-based processing and automatic retry logic.
- Extended **Python** data pipeline scripts to process partner CSV exports, automating manual data entry tasks and saving **3 hours weekly** of engineering time per integration.
- Authored technical documentation and API reference guides for internal and external developers, reducing onboarding time for new partner integrations by **40%**.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed a full-stack healthcare education SaaS application in **React** and **Node.js** with **PostgreSQL**, serving over **30,000 monthly active users** and managing HIPAA-compliant student records.
- Implemented real-time educational analytics module using **WebSockets** and **React**, tracking course completion rates and delivering personalized learning outcome insights to instructors.
- Built a student information system processing enrollment, certification tracking, and regulatory compliance data for **15,000+ students**, streamlining accreditation reporting workflows.
- Integrated third-party payment processing and medical credentialing APIs into the platform, automating provider verification and reducing manual review cycles significantly.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Delivered React and **Node.js** features for medical education course delivery platform, implementing video streaming integrations and responsive UI components for learner accessibility.
- Designed and implemented **RESTful APIs** with **Node.js** and **PostgreSQL** supporting enrollment and student record management, improving data consistency across 3 internal systems.
- Participated in agile sprints, contributing to code reviews and deploying features through **CI/CD pipelines** with **Docker**-based testing environments.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed a Node.js and **Python** imaging SDK used by 500+ enterprise developers, shipping barcode detection and document imaging components across multiple platforms.
- Integrated imaging components into enterprise workflow applications, resolving compatibility issues and contributing to release documentation adopted by external development teams.
