Summary

Senior Software Engineer with **8 years** of experience building and maintaining complex backend systems and integrations. At **Tackle.io**, architected multi-tenant SaaS platform serving 200+ ISV partners with 2M+ daily API transactions. At **Ultimate Medical Academy**, developed healthcare education platform supporting 50,000+ users with HL7 FHIR-compliant data exchange. Proficient in **Python, Django, React**, and **TypeScript** with demonstrated expertise in API design and distributed systems. Brings end-to-end ownership mindset and async-first collaboration experience to Avo's EHR integration platform serving hospital and clinic partners. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML/CSS

Backend Frameworks: Django, Django REST Framework, Node.js, Express

Healthcare Standards: HL7 FHIR, HIPAA, FERPA, HL7 Messaging, EHR Integration

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, PostgreSQL, Terraform, Redis

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Led a 6-engineer team to design and deploy a multi-tenant SaaS integration platform processing 2M+ API calls daily, achieving 99.9% uptime through reliable error handling and monitoring.
- Engineered **Python** and **Django** backend services for a marketplace serving 200+ ISV partners, implementing **OAuth2/JWT** authentication and reducing authentication latency from 150ms to 40ms.
- Designed and maintained 40+ RESTful APIs with comprehensive API versioning strategies, facilitating smooth third-party integrations with **Salesforce**, **HubSpot**, and **Snowflake**.
- Mentored 3 junior engineers through code reviews and pair programming, fostering a culture of knowledge sharing and technical excellence across distributed teams.
- Optimized database queries using **Django ORM** and **PostgreSQL** indexing, reducing page load times from 3s to under 1s for 500+ daily active users.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed integration solutions for cloud marketplaces including **AWS**, Azure, and GCP, enabling software vendors to list and sell products through major platforms.
- Built and maintained **Python** SDKs with comprehensive documentation and code examples, adopted by 150+ developer teams for marketplace automation workflows.
- Created test suites achieving 85% code coverage, reducing production bugs by 40% and improving overall system reliability for enterprise customers.
- Implemented webhook and event-driven architectures using message queues, processing 10,000+ events daily with sub-second latency across distributed services.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Led migration of on-premise infrastructure to **AWS**, reducing operational costs by \$30,000 annually while improving system availability and disaster recovery capabilities.
- Designed **HL7 FHIR**-compliant RESTful APIs for healthcare education data exchange, ensuring interoperability with external medical systems and payer databases.
- Architected and developed **Django**-based student management systems supporting 50,000+ enrolled learners with enrollment, certification tracking, and compliance reporting.
- Modernized legacy PHP applications to **React/TypeScript** frontends, improving page performance by 60% and increasing user satisfaction scores significantly.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed **Django REST Framework** APIs for course content delivery and assessment grading, supporting 20+ concurrent users with efficient data serialization.
- Built interactive quiz and exam features using **JavaScript** and AJAX, enhancing student engagement and improving course completion rates measurably.
- Participated in **Agile** ceremonies and sprint planning, contributing to timely feature delivery through iterative improvements and transparent team communication.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed **JavaScript** and **Python** SDKs for document imaging APIs, creating tutorials and code samples that increased developer adoption by 25%.
- Resolved integration issues and provided technical support to enterprise clients, maintaining high customer satisfaction ratings throughout the internship period.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
