Summary

Senior Software Engineer with **8 years** of experience designing and delivering enterprise software solutions across healthcare, SaaS, and developer tools sectors. Demonstrated expertise in full-stack web development using **React**, **Node.js**, and **Python**, with hands-on experience deploying and maintaining **AWS**-based cloud infrastructure. Led cross-functional teams at **Tackle.io** and **Ultimate Medical Academy** to modernize legacy systems, improve data processing efficiency, and ensure HIPAA compliance. history of building scalable APIs, mentoring engineering teams, and reducing operational costs through automation. Seeking to leverage backend engineering depth and infrastructure knowledge in a cloud infrastructure leadership role.

Core Skills

Languages & Frameworks: JavaScript, TypeScript, Python, React, Node.js, Express, REST APIs, GraphQL, HTML, CSS, Golang, Ruby

Cloud & Infrastructure: AWS, EC2, S3, Lambda, RDS, CloudFront, IAM, CI/CD Pipelines

Databases: PostgreSQL, MySQL, MongoDB, Redis, Database Optimization

DevOps & Tools: Docker, Kubernetes, GitHub Actions, Terraform, Jenkins, Agile, Jira

Leadership & Process: Team Leadership, Code Review, Technical Mentoring, System Architecture, Documentation, Linux

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and deployed multi-tenant SaaS platform on **AWS**, enabling ISV partners to automate cloud marketplace listings and streamline revenue operations across **AWS**, **Azure**, and **GCP** ecosystems.
- Led migration of monolithic backend services to containerized microservices using **Docker** and **Kubernetes**, reducing deployment time from hours to minutes and improving system reliability by 40%.
- Designed and implemented **RESTful APIs** and **GraphQL** schemas handling 2M+ daily transactions, supporting real-time data synchronization between marketplace platforms and partner systems.
- Mentored team of 5 engineers through code reviews, technical design sessions, and architecture replanning, establishing coding standards and best practices that reduced production bugs by 35%.
- Built automated CI/CD pipelines with **GitHub Actions** and **Terraform**, eliminating manual infrastructure provisioning and reducing environment setup time from 2 days to 30 minutes.
- Implemented **AWS Lambda**-based event processing pipeline for partner webhooks, handling 500K+ daily events with 99.9% uptime and sub-second latency requirements.
- Collaborated with security team to enforce **IAM** policies and implement **OAuth2** authentication, achieving **SOC2** compliance and eliminating unauthorized access vulnerabilities.
- Reduced cloud infrastructure costs by optimizing **EC2** auto-scaling configurations and implementing **S3** lifecycle policies, achieving 25% cost reduction annually.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed core platform features using **React** and **Node.js**, supporting marketplace listing management for 200+ enterprise SaaS vendors across cloud platforms.
- Integrated third-party billing and payment APIs, implementing secure webhook handlers and reconciliation processes that processed \$10M+ in monthly transactions.
- Created comprehensive API documentation and developer onboarding guides, reducing partner integration time from 2 weeks to 3 days.
- Optimized database queries and implemented caching layers with **Redis**, improving API response times from 3s to 200ms for complex marketplace analytics queries.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built HIPAA-compliant student portal using **React** and **Node.js**, serving 50,000+ healthcare students with course materials, assessments, and certification tracking capabilities.
- Designed and maintained **PostgreSQL** databases for student records, financial aid processing, and compliance reporting, ensuring 100% data integrity and audit readiness.
- Developed automated data pipelines using **Python** and **AWS Lambda** for student enrollment sync with external education systems, processing 10,000+ records daily.
- Led migration of legacy PHP applications to modern **JavaScript** stack, reducing page load times by 60% and improving mobile accessibility compliance.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Implemented student assessment engine with dynamic scoring algorithms, supporting 500+ course assessments and reducing grading time by 75% for instructional staff.
- Built notification system using **AWS SNS** and **SQS** for enrollment alerts, assignment deadlines, and graduation requirements, achieving 95% student engagement rates.
- Developed administrative dashboard for enrollment management, enabling staff to process applications 40% faster through simplified workflows.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed SDK documentation and code samples in **JavaScript** and **Python** for document imaging SDKs, improving developer adoption by 30%.
- Built automated testing framework for SDK functionality, reducing QA cycle time and identifying 50+ bugs before release.
