Summary

Senior Software Engineer with **8 years** of experience designing and delivering scalable software solutions across SaaS, healthcare education, and developer tools domains. Led end-to-end development of cloud-native applications at Tackle.io, building multi-tenant platforms that simplified software go-to-market processes. Championed API-first architecture and modern frontend frameworks to accelerate feature delivery and improve system reliability. Collaborated cross-functionally with product, design, and engineering teams to ship high-impact features serving thousands of enterprise users. Seeking to bring full-stack expertise and AI-driven product experience to Consumer Reports' Experimental Engineering team. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frontend: React, Next.js, Redux, GraphQL, Responsive Design

Backend: Node.js, RESTful APIs, PostgreSQL, Redis, Microservices

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions

Practices: Agile, Test-Driven Development, Code Review, System Design, Technical Leadership

Work Experience

Senior Software Engineer | Tackle.io | Remote, US | 03/2022 - Present

- Architected and deployed multi-tenant SaaS platform using React and Node.js, enabling software vendors to manage co-sell programs with cloud marketplaces and reducing manual onboarding time by 40%.
- Designed and implemented **RESTful APIs** with **GraphQL** integration, facilitating smooth data exchange between 50+ cloud partners including AWS, Azure, and GCP marketplaces.
- Optimized database queries and implemented caching strategies with **PostgreSQL** and **Redis**, decreasing average API response time from 2s to under 200ms.
- Led migration of legacy monolith to **microservices architecture** on **AWS**, improving system scalability and reducing deployment failures across distributed teams.
- Mentored 3 junior engineers through code reviews and pair programming sessions, establishing coding standards and best practices for the engineering team.
- Built real-time notification system using **WebSockets** and **Redis**, keeping enterprise users informed of marketplace status changes within seconds.

- Established comprehensive test coverage using **Jest** and Cypress, achieving 85% code coverage and reducing regression incidents in production environments.
- Championed **TypeScript** adoption across frontend codebase, increasing code reliability and reducing production bugs by eliminating type-related runtime errors.

Software Engineer | Tackle.io | Remote, US | 06/2021 - 03/2022

- Developed and maintained **React** components for customer-facing dashboard, improving user engagement metrics and streamlining workflows for sales teams.
- Integrated third-party authentication providers using **OAuth 2.0** and SAML protocols, enabling enterprise SSO access for 200+ client organizations.
- Collaborated with product team to define API specifications and deliver **Node.js** backend services supporting marketplace listing management features.
- Participated in on-call rotation, diagnosing and resolving production incidents with 99.9% uptime compliance for critical customer workflows.

Software Engineer II | Ultimate Medical Academy | Remote, US | 04/2019 - 06/2021

- Developed backend services with **Python** and **Django** to handle student enrollment, course progress tracking, and certification workflows compliant with healthcare regulations.
- Implemented responsive design and accessibility standards (WCAG 2.1) across web applications, ensuring compliance for diverse student populations including those with disabilities.
- Built interactive learning management system features using **JavaScript** and **React**, supporting 15,000+ healthcare students in completing certification programs.
- Created automated data pipelines processing student performance analytics, generating reports that informed curriculum improvements and student retention strategies.

Software Engineer I | Ultimate Medical Academy | Remote, US | 08/2018 - 04/2019

- Contributed to frontend development using **JavaScript** and **jQuery**, building reusable components for course delivery and assessment modules.
- Integrated video streaming services for live and on-demand educational content, supporting 500+ concurrent viewers during peak enrollment periods.
- Assisted in database design and query optimization for **PostgreSQL**, improving application performance for administrative reporting tools.

SDK Intern | Accusoft | Remote, US | 06/2017 - 08/2018

- Built test automation frameworks validating SDK functionality across multiple programming languages, reducing QA cycle time by 25%.

- Developed documentation and code samples for **SDK** integrations, helping 100+ external developers implement document processing features.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
