Summary

Senior Software Engineer with **8 years** of experience designing and delivering scalable distributed systems and cloud-native applications. Led development of multi-tenant API platforms at Tackle.io, supporting enterprise SaaS integrations across CRM and cloud marketplaces. Built and maintained data-driven educational platforms for Ultimate Medical Academy, serving 15,000+ active learners. Architected backend services processing high-volume data streams with **Go**, **Python**, **Kubernetes**, and **Terraform**. Delivered infrastructure optimizations reducing operational costs and improving system reliability. Seeking to leverage distributed systems and cloud infrastructure at CoreWeave to support large-scale AI/ML workloads.

Core Skills

Programming Languages: Go, Python, TypeScript, SQL, Bash, JavaScript, HTML, CSS

Cloud & Infrastructure: AWS, GCP, Kubernetes, Terraform, Docker, AWS EKS, AWS Lambda

Databases & Storage: PostgreSQL, MySQL, Redis, DynamoDB, S3, Bigtable concepts

Backend & APIs: RESTful APIs, gRPC, GraphQL, Event-driven architecture, Kafka, Pub/Sub

DevOps & Observability: CI/CD pipelines, distributed systems, monitoring, logging, incident response, on-call rotation

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Designed and developed multi-tenant RESTful APIs using **Go** and **TypeScript**, enabling ISV partners to integrate with cloud marketplaces and CRM platforms at scale.
- Established on-call rotation and incident response procedures, decreasing mean time to resolution for critical production issues from 2 hours to 25 minutes.
- Architected backend microservices on **Kubernetes** clusters hosted in **AWS**, improving system reliability and reducing deployment failures across 500+ daily builds.
- Led migration of legacy monolith services to containerized **Kubernetes** deployments, achieving 99.9% uptime and enabling horizontal scaling during peak traffic.
- Built and maintained **Terraform** infrastructure modules for repeatable cloud resource provisioning, cutting environment setup time from days to hours.
- Implemented event-driven workflows using **Kafka** for asynchronous data processing, handling over 50,000 events per day with sub-second latency.
- Optimized **PostgreSQL** database queries and indexing strategies, reducing API response times by 40% for complex marketplace reporting endpoints.
- Mentored 3 junior engineers on distributed systems patterns, API design, and cloud-native development practices.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed customer-facing APIs and backend services using **Go** and **Python**, supporting integration workflows for enterprise cloud partners.
- Collaborated with product and design teams to ship 12 new API endpoints, expanding platform capabilities for marketplace analytics.
- Implemented data validation and error handling pipelines, improving API reliability and reducing failed transactions by 30%.
- Configured CI/CD pipelines with automated testing and deployments to **AWS** environments, accelerating release cycles.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Optimized backend query performance and implemented caching layers with Redis, reducing page load times from 4 seconds to under 1 second.

- Built and maintained data-intensive web applications using **Python** and **Django**, serving educational content to 15,000+ active learners monthly.
- Developed RESTful API integrations with third-party learning management systems, enabling smooth single sign-on and grade synchronization.
- Designed **MySQL** database schemas and migration strategies for course enrollment and student progress tracking systems.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Contributed to development of student-facing features using **Python** and Django, supporting regulatory compliance for healthcare education programs.
- Participated in code reviews and Agile sprint ceremonies, collaborating with cross-functional teams to deliver features on schedule.
- Assisted in building automated testing suites and CI pipelines, increasing code coverage from 45% to 80%.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed code samples and documentation for **RESTful API** integrations, helping external developers implement document processing workflows.
- Built internal tooling using **Python** to automate testing of SDK features across multiple platforms.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
