Summary

Senior Software Engineer with **8 years** of experience building and delivering full-stack applications across SaaS, healthcare education, and developer tooling domains. Led end-to-end development of multi-tenant platforms serving enterprise customers, designed **RESTful API** architectures handling high request volumes, and integrated **CI/CD pipelines** with automated testing frameworks. Partnered with cross-functional teams to ship features impacting thousands of end users. Works on using **AI tooling** and modern development practices to build reliable, production-grade systems. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, Java, TypeScript, React, Node.js, Django, FastAPI, Spring Boot, JavaScript, HTML, CSS

Cloud & Infrastructure: AWS, Azure, GCP, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Data & APIs: PostgreSQL, RESTful APIs, GraphQL, Redis, Elasticsearch, ORM

AI & Observability: AI/LLM tooling, agentic development workflows, OpenTelemetry, Datadog, New Relic, Splunk

Practices & Tools: Agile/Scrum, code review, unit testing, integration testing, Jira, Confluence, OAuth2, SAML

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and shipped multi-tenant **SaaS platform** features in **Python** and **React**, enabling enterprise customers to manage recurring revenue workflows end to end.
- Designed and implemented **RESTful API** integrations with **AWS** services, reducing manual data entry tasks by **3+ hours per week** for sales operations teams.
- Built and maintained **CI/CD pipelines** using **GitHub Actions** with automated **unit and integration testing**, increasing deployment confidence across **5+ environments**.
- Collaborated with Product and Data Engineering to define API contracts and data models for new marketplace features serving **30+ ISV partners**.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Participated in on-call rotation and resolved **P0 production incidents**, maintaining **99.9% uptime** SLA for core platform services.
- Developed **TypeScript** and **Node.js** backend services powering Tackle's **cloud marketplace** integrations with **AWS** and **GCP**.
- Built reusable **React** components for the customer-facing dashboard, improving UI consistency across **4 feature modules**.
- Integrated third-party billing and subscription APIs, supporting **multiple payment providers** with idempotent transaction handling.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Owned development of the healthcare education student portal in **Python/Django**, supporting over **8,000 active learners** across certification programs.

- Designed **PostgreSQL** schema and **ORM** models for course content and student progress tracking, replacing a fragmented spreadsheet-based workflow.
- Modernized legacy **Java** reporting modules to a **Spring Boot** microservice architecture, enabling real-time enrollment analytics for institutional stakeholders.
- Built **RESTful API** endpoints for asynchronous content delivery and assessment grading, reducing student wait times significantly.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Integrated third-party video streaming services into the LMS platform, enabling multimedia course delivery for **remote learners**.
- Developed and maintained **React**-based front-end features for the student and faculty interfaces, improving accessibility compliance.
- Authored automated tests achieving **80%+ code coverage** across critical user flows, reducing regression bugs in production.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed **SDK** documentation and code samples in **Java** and **TypeScript** for Accusoft's document imaging product line, reducing customer onboarding friction.
- Contributed to automated testing suite for image processing pipelines, improving release confidence for quarterly product launches.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
