Summary

Senior Software Engineer with **8 years** experience building enterprise applications and data solutions. Led end-to-end development of multi-tenant SaaS platforms serving 100+ enterprise customers. Designed and implemented **RESTful APIs**, **microservices architectures**, and **CI/CD pipelines** reducing deployment times from hours to minutes. Partnered with cross-functional teams to deliver **.NET applications** across healthcare and SaaS domains. Next focus on **AI-driven solutions** and advanced data architectures. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Programming Languages: C#, .NET Core, Python, JavaScript, TypeScript, SQL, T-SQL, HTML, CSS

Cloud & DevOps: Azure DevOps, AWS, Azure, Docker, Kubernetes, CI/CD Pipelines, Terraform

Databases & Data: SQL Server, PostgreSQL, MongoDB, Entity Framework, Databricks, ETL/ELT Pipelines

Application Development: RESTful APIs, GraphQL, Microservices, Blazor, Angular, React, ASP.NET MVC

Tools & Practices: Git, Agile/Scrum, Jira, Confluence, Application Monitoring, On-Call Support

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and delivered multi-tenant SaaS platform features using **.NET 6/7** and **Angular**, supporting 150+ enterprise customers and processing millions of transactions monthly.
- Built **CI/CD pipelines** in **Azure DevOps** that automated build, test, and deployment processes, cutting release cycles from weekly to daily with zero downtime deployments.
- Led migration of monolithic application to **microservices architecture** using **Docker** and **Kubernetes**, improving system scalability and reducing infrastructure costs by 30%.
- Established application monitoring and alerting systems using **Datadog**, enabling proactive incident response and reducing mean time to resolution from 45 minutes to 12 minutes.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed core platform functionality using **C#** and **.NET 5**, contributing to features that expanded customer adoption by 40% year-over-year.
- Optimized database queries and implemented caching strategies with **Redis**, improving API response times from 800ms to 200ms.
- Integrated third-party payment providers and **webhook systems**, enabling real-time transaction notifications and automated reconciliation processes.
- Participated in on-call rotation, resolving production incidents and maintaining platform reliability across 99.9% uptime requirements.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Designed and maintained **SQL Server** databases implementing complex stored procedures and query optimizations, reducing report generation time from 3 minutes to 30 seconds.
- Led initiative to modernize legacy codebases by introducing **repository patterns** and dependency injection, improving test coverage from 15% to 75%.
- Built student-facing web applications using **ASP.NET MVC** and **Entity Framework**, serving 50,000+ enrolled students across multiple educational programs.
- Developed **integration APIs** connecting learning management systems with third-party enrollment and financial aid platforms, streamlining administrative workflows.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Delivered administrative dashboards and reporting tools using **C#** and **SQL Server**, enabling data-driven decisions for enrollment management teams.
- Implemented automated email notification systems using **Azure Functions** and **SendGrid**, reducing manual communication workload by 15 hours weekly.
- Supported legacy **ASP.NET Web Forms** applications while gradually introducing modern patterns, ensuring business continuity during technology transitions.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Created automated test suites for SDK functionality using **C#** and **NUnit**, increasing release confidence and reducing regression issues.
- Developed documentation and code samples for **.NET SDK** integrations, assisting 200+ developers in implementing document imaging features.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
