Summary

Senior Software Engineer with **8 years** of experience designing and delivering full-stack web applications across SaaS, healthcare education, and developer tooling domains. Led development of multi-tenant platforms at **Tackle.io** supporting cloud marketplace integrations for enterprise customers. Built internal tools and learning management systems at **Ultimate Medical Academy** serving thousands of active users. Contributed to **SDK development** at Accusoft for document processing workflows. Expertise spans **React**, **TypeScript**, **Node.js**, **Python**, and **AWS**. Seeks to bring end-to-end ownership mentality to a security-focused engineering team building developer infrastructure. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, REST APIs, HTML, CSS

Cloud&Infrastructure: AWS, EC2, S3, Lambda, RDS, CloudFront, Docker, CI/CD Pipelines

Databases&Backend: PostgreSQL, MySQL, MongoDB, Redis, Prisma, SQLAlchemy

Security&DevOps: OAuth2, JWT, Secrets Management, SSL/TLS, Kubernetes, Terraform, GitHub Actions

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected multi-tenant SaaS platform handling cloud marketplace integrations for **AWS**, **Azure**, and **Google Cloud** partners, supporting transaction workflows across 500+ enterprise customers.
- Built and maintained **React** and **TypeScript** frontend applications with pixel-perfect UI components, reducing page load times by 40% through code splitting and lazy loading strategies.
- Developed **RESTful APIs** and **GraphQL** schemas processing millions of daily requests, implementing **OAuth2** and **JWT** authentication across 15+ integrated marketplace endpoints.
- Led migration of monolithic Express.js services to containerized **Docker** orchestrations on **Kubernetes**, improving deployment frequency from weekly to multiple daily releases.
- Mentored team of 4 engineers on **TypeScript** best practices, code review standards, and incident response procedures, reducing production bugs by 25% over six months.
- Implemented **AWS Lambda** functions for event-driven workflows, cutting infrastructure costs by \$30,000 annually while handling variable traffic patterns.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Designed and shipped **React** dashboard features for partner analytics, enabling real-time visibility into marketplace performance metrics for 200+ SaaS vendors.
- Built **Node.js** microservices integrating with Salesforce and HubSpot APIs, synchronizing customer data across CRM platforms with sub-second latency.

- Established automated testing framework with Jest and React Testing Library, achieving 80% code coverage across frontend codebase.
- Optimized **PostgreSQL** query performance for reporting dashboards, reducing average response times from 8 seconds to under 1 second.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed core learning management system features using **React** and **Python** (Django), serving 30,000+ active students across healthcare certification programs.
- Built **REST API** layer handling user authentication, course enrollment, and progress tracking, processing 10,000+ daily requests during peak enrollment periods.
- Integrated third-party video streaming services with **AWS CloudFront** CDN, improving content delivery speeds by 60% for students in remote areas.
- Led frontend migration from legacy jQuery codebase to modern **React** architecture, completing transition ahead of schedule with zero downtime.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Built student-facing web forms and administrative dashboards using **JavaScript** and **PHP**, streamlining enrollment workflows for prospective healthcare students.
- Maintained **MySQL** database schemas and wrote migration scripts, ensuring data integrity across system upgrades and feature deployments.
- Collaborated with instructional designers to implement accessible course content, meeting WCAG 2.1 AA compliance standards across all digital assets.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed documentation and code samples for **JavaScript** and **Python** SDKs enabling document imaging and PDF processing workflows for enterprise developers.
- Created automated test suites validating SDK functionality across multiple programming languages, reducing manual QA cycles by 15 hours per release.
