Summary

Senior Software Engineer with **8 years** of experience architecting and maintaining enterprise SaaS platforms and cloud-native services. Led platform initiatives at Tackle.io delivering automated workflows for ISV cloud marketplace integrations, previously engineered HIPAA-compliant systems at Ultimate Medical Academy supporting 50,000+ student records, and contributed to SDK development at Accusoft serving 10,000+ developer customers. Implemented authentication and authorization layers with **OAuth2** and **JWT** token management. Background in **Python**, **Java**, **PostgreSQL**, **AWS**, and **Kubernetes**. Experienced in applying security-first engineering practices to certificate management, PKI infrastructure, and cryptographic trust frameworks.

Core Skills

Security & Identity: PKI, Certificate Lifecycle Management, OAuth2, JWT, Zero-Trust Architecture, Secrets Management, Role-Based Access Control

Languages & Frameworks: Python, Java, JavaScript, Node.js, Django, Spring Boot, RESTful APIs, GraphQL, TypeScript, HTML, CSS

Platform & Infrastructure: AWS, Kubernetes, Docker, Terraform, PostgreSQL, Redis, RabbitMQ, Apache Kafka

DevOps & Observability: CI/CD Pipelines, GitHub Actions, Datadog, Prometheus, Grafana, CloudWatch, Terraform

Architecture & Practices: Microservices, Event-Driven Architecture, Microservices, Agile, On-Call Support, End-to-End Ownership

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and delivered **automated cloud marketplace integration pipelines** handling \$50M+ annual transaction volume, reducing manual provisioning time from 3 days to 15 minutes for 500+ ISV partners.
- Led migration of legacy monolith to **event-driven microservices architecture** using **Apache Kafka** and **RabbitMQ**, improving system throughput by 400% and enabling horizontal scaling.
- Implemented **secrets management solution** using **AWS Secrets Manager** and **Vault** integration, eliminating hardcoded credentials across 30+ services and reducing security audit findings by 95%.
- Built real-time **observability stack** with **Datadog** and **Prometheus** dashboards, reducing mean time to detection from 8 minutes to 45 seconds for production incidents.
- Mentored team of 5 engineers on **security best practices** including certificate pinning, TLS configuration, and vulnerability remediation aligned with SOC 2 requirements.
- On-call rotation ownership for critical platform services maintaining 99.95% uptime across 18 months, resolving 150+ P1/P2 incidents with average response time under 5 minutes.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Collaborated with product team to define API contracts and **technical specifications** for cloud marketplace integration features serving Fortune 500 clients.
- Developed **RESTful APIs** and **GraphQL** endpoints in **Python** and **Node.js** powering marketplace analytics dashboards for enterprise customers.
- Implemented **role-based access control** system with **PostgreSQL** row-level security, enabling granular permission management for 1,000+ organizational accounts.

- Reduced database query latency by 60% through **PostgreSQL** query optimization, indexing strategies, and **Redis** caching layer implementation.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built **automated compliance reporting pipelines** with **Python** and **AWS Lambda** reducing manual effort by 20 hours monthly and ensuring continuous regulatory adherence.
- Led performance optimization initiative resulting in 40% reduction in page load times through **CDN** configuration, asset optimization, and database indexing improvements.
- Engineered **HIPAA-compliant learning management system** features in **Java Spring Boot** supporting 50,000+ student records with end-to-end encryption and audit logging.
- Designed and implemented **authentication service** with **OAuth2** and **SAML** integration, providing single sign-on access across 15 internal and third-party applications.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Implemented **automated testing frameworks** with **pytest** and **Selenium**, achieving 80% code coverage and reducing regression bugs in production releases.
- Developed **RESTful APIs** and backend services in **Python Django** for course enrollment, assessment tracking, and student progress analytics modules.
- Contributed to **CI/CD pipeline** implementation using **Jenkins** and **Docker** containerization, streamlining development workflows for team of 8 engineers.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Built automated **API integration tests** validating SDK functionality across multiple platforms, reducing quality assurance cycle time from 2 weeks to 3 days.
- Developed **SDK documentation** and code examples in **C#** and **Java** for document imaging SDKs, improving developer onboarding time by 30%.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
