Summary

Senior Software Engineer with **8 years** of experience building and maintaining enterprise SaaS platforms at Tackle.io and healthcare compliance systems at Ultimate Medical Academy. Designed and shipped **Python** backend services handling tiered subscription billing, migrated infrastructure to **AWS** and **GCP** reducing costs by 40%, and built React dashboards increasing customer engagement by 25%. Implemented **OAuth2** authentication and role-based access controls for SOC 2 compliance across multiple products. Led a team of 5 engineers on microservices migration strategy, shifting deployment cadence from weekly to daily releases. Seeking to apply deep backend development expertise and security-focused mindset to privileged access management solutions.

Core Skills

Languages: Python, JavaScript, TypeScript, C++, C#, SQL, HTML, CSS

Frameworks: React, Node.js, Flask, .NET Core, Django

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, GitHub Actions

Data & Security: PostgreSQL, Redis, OAuth2, Role-Based Access Control, HIPAA Compliance, SOC 2

Tools: GraphQL, REST APIs, Datadog, PagerDuty, Agile/Scrum

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Designed and shipped **Python** backend services handling tiered subscription billing with RESTful APIs, supporting 30+ enterprise customer segments and reducing average response latency from 3s to under 200ms through database optimization.
- Migrated production services from single-cloud deployment to **AWS** and **GCP** multi-cloud architecture, achieving 99.9% uptime and cutting monthly infrastructure costs by 40% through resource right-sizing.
- Built customer-facing dashboards using **React** and **TypeScript** that visualized revenue metrics and usage analytics, increasing user engagement by 25% and reducing churn for enterprise accounts.
- Implemented query analysis pipelines, **Redis** caching layers, and database indexing strategies that reduced average query execution time from 3 seconds to under 200 milliseconds across high-traffic endpoints.
- Established security hardening practices including **OAuth2** authentication, **Role-Based Access Control**, and encrypted data transmission for SOC 2 Type II compliance across all product lines.
- Mentored 5 junior engineers through weekly code reviews, architecture discussions, and pair programming sessions while conducting technical interviews and onboarding new team members.
- Built monitoring and alerting infrastructure with **Datadog** that automated incident detection and reduced mean time to acknowledge alerts by 60% during on-call rotations.
- Led microservices migration initiative for a team of 5 engineers, designing service boundaries and deployment pipelines that shifted release cadence from weekly to daily deployments.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Built and maintained backend services using **Python** and **Node.js**, shipping features for revenue automation platform used by 200+ ISV partners across cloud marketplaces.
- Designed and implemented **RESTful** and **GraphQL** APIs enabling smooth data flow between marketplace platforms, supporting 3 major cloud providers with consistent contract definitions.
- Developed **CI/CD pipelines** with **GitHub Actions** that automated unit testing, integration testing, and deployments, reducing release cycle time by 50% and eliminating manual deployment errors.
- Collaborated with product and design teams to define API specifications, participated in sprint planning, and delivered 15+ features across two major product releases within quarterly timelines.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed and maintained HIPAA-compliant web applications in **Python** and **C#**, implementing encryption at rest and audit logging for healthcare data protection across 10,000+ student records.
- Created automated regression test suites that increased code coverage from 45% to 80%, reducing production incidents by 30% during 18-month tenure in the role.
- Optimized database queries and implemented **Redis** caching strategies that reduced page load times by 45% for the student portal serving 8,000+ concurrent users.
- Built Student Management System features including enrollment tracking, compliance reporting, and automated notifications using **React** frontend and **PostgreSQL** backend.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Contributed to core learning platform features using **Python** and **React**, implementing student progress tracking and course completion workflows for 6,000+ enrolled students.
- Integrated third-party educational tools and payment processors with **RESTful** API development, improving platform functionality and reducing manual processing overhead by 20%.
- Participated in Agile ceremonies and collaborated with instructional designers to translate business requirements into technical specifications for 12+ course module releases.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed sample applications and documentation for **PrizmDoc** product line, creating code examples in **C++** and **Java** that reduced developer onboarding time by 15%.
- Built **REST** API integration examples demonstrating document viewing and conversion features, contributing to improved customer satisfaction scores on developer community forum.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
