Summary

Senior Software Engineer with **8 years** of experience designing and delivering scalable software solutions across SaaS, healthcare education, and developer tools domains. Led end-to-end architecture of multi-tenant platforms processing high-volume API traffic, implemented zero-trust security models protecting sensitive healthcare data, and built CI/CD pipelines reducing deployment cycles from days to minutes. Expertise spans **Python, Java, AWS, Kubernetes, and Terraform**. Partners with cross-functional teams to deliver production systems serving thousands of concurrent users with on-call ownership. Focuses on infrastructure automation and platform reliability engineering. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages and Frameworks: HTML, CSS

DevOps & Infrastructure: Kubernetes, Terraform, Ansible, Docker, Helm, ArgoCD, GitHub Actions, CI/CD Pipeline

Cloud & Security: AWS, Azure, Security Groups, IAM Policies, OAuth2, HIPAA Compliance, VPC Networking, SSL/TLS

Programming & Automation: Python, Java, Go, JavaScript, TypeScript, Bash, REST API Design, GraphQL

Data & Monitoring: PostgreSQL, Redis, Datadog, Prometheus, Grafana, PagerDuty, Splunk

Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected multi-tenant SaaS platform serving 50+ enterprise customers, designing event-driven microservices that handled 10M+ daily API transactions with 99.9% uptime.
- Reduced cloud infrastructure costs by \$80K annually through Kubernetes pod optimization, spot instance utilization, and automated scaling policies in production environments.
- Led zero-trust security initiative implementing **OAuth2** client credentials, **IAM Policies**, and encrypted secrets management protecting sensitive marketplace integrations.
- Built **Terraform** modules and **Helm** charts standardizing deployment across 20+ microservices, decreasing new service time-to-production from 2 weeks to 2 days.
- Implemented **ArgoCD** GitOps workflows with automated testing gates, achieving 15+ daily deployments with zero-downtime rollouts and rollback capabilities.
- Established on-call rotation and incident response playbooks, improving mean-time-to-resolution from 45 minutes to 12 minutes for critical production issues.
- Designed real-time data pipelines using **Python** async workers and **Redis** streams, processing webhook events with sub-second latency for marketplace integrations.
- Mentored 4 junior engineers through code review standards, architecture discussions, and system design reviews, promoting security-first engineering culture.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed **RESTful APIs** and **GraphQL** endpoints in **Python** enabling marketplace integrations with AWS, Azure, and Google Cloud platforms.
- Integrated SaaS billing webhooks processing subscription events, ensuring accurate revenue recognition and customer lifecycle management.
- Built automated testing suite with 85% code coverage using **GitHub Actions**, catching regressions before production deployments.

- Containerized legacy services with **Docker** and ran local development environments using **Docker Compose**, improving developer onboarding time.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed full-stack healthcare education platform features using **Python** Django, **JavaScript** React, and **PostgreSQL** for 15,000+ active students.
- Implemented HIPAA-compliant data handling with encryption at rest, audit logging, and role-based access controls protecting student health information.
- Migrated monolithic application to containerized architecture on **AWS ECS**, achieving 40% reduction in page load times and improved scalability.
- Automated **AWS** infrastructure provisioning with **Terraform**, enabling reproducible environments across development, staging, and production.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Built **REST API** integrations connecting learning management systems with third-party video conferencing and assessment platforms.
- Developed administrative dashboard features reducing manual student record updates by 8 hours weekly through automated data synchronization.
- Participated in agile sprints delivering 25+ feature enhancements across course enrollment and certification tracking modules.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed sample applications and documentation for image processing SDK, reducing customer support tickets by 20% through clear code examples.
- Built automated testing framework for SDK regression testing, improving release confidence and reducing manual QA cycles.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
