Summary

Senior Software Engineer with **8 years** of experience designing and delivering enterprise-grade software solutions across healthcare, education, and SaaS platforms. Demonstrated expertise in building **RESTful APIs**, implementing **cloud-native architectures**, and ensuring **HIPAA-compliant data handling** in regulated environments. Led cross-functional teams of 5+ engineers delivering platform upgrades that reduced operational costs by 30%. Seeking to leverage full-stack development skills and healthcare domain expertise to contribute to new biotechnology innovations at ImmunityBio. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Platforms: Node.js, React, Django, Spring Boot, Express.js

Databases & Data Management: PostgreSQL, MongoDB, Redis, Elasticsearch, Data Pipelines

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Terraform, GitHub Actions

Healthcare & Compliance: HIPAA Compliance, Protected Health Information (PHI), Healthcare Data Security, FDA Regulatory Standards, Clinical Trial Systems, Bash, Linux, Ansible, Prometheus, Grafana, Jenkins

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Led migration of legacy monolith to containerized architecture using Docker and Kubernetes, improving deployment frequency from monthly to daily releases.
- Collaborated with cross-functional teams of 5+ engineers to deliver platform features that increased customer retention by 25% over 12 months.
- Optimized database queries in PostgreSQL and MongoDB, reducing average API response times from 3s to under 1s for high-traffic endpoints.
- Developed and secured RESTful APIs with OAuth2 and JWT authentication, reducing data breach risks by implementing end-to-end encryption protocols.
- Architected and deployed microservices on AWS, achieving 99.9% uptime for marketplace SaaS platform serving 500+ enterprise customers.
- Implemented automated testing frameworks that achieved 85% code coverage, decreasing production bugs by 40% in quarterly assessments.
- Designed real-time data pipelines using Python and Redis to process 100K+ events daily for analytics dashboards.

- Mentored junior developers through code reviews and pair programming sessions, elevating team overall productivity by 20%.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Built TypeScript and React frontend components for B2B marketplace, improving user engagement metrics by 15% across key customer segments.
- Developed backend services using Node.js and Express.js to support marketplace listing management with CRUD operations at scale.
- Established CI/CD pipelines with GitHub Actions that automated testing and deployment workflows, reducing manual intervention by 60%.
- Integrated third-party payment processing APIs with Stripe and PayPal, processing \$2M+ in monthly transactions securely.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Implemented secure patient data handling protocols using encryption at rest and in transit, achieving full compliance during annual audits.
- Led development of telemedicine integration features enabling virtual classroom sessions for 500+ concurrent users during pandemic.
- Designed and maintained HIPAA-compliant web applications for healthcare education platform serving 30,000+ active learners nationwide.
- Developed Django REST APIs powering student enrollment and certification tracking systems with 99.5% availability.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Created interactive learning modules using JavaScript and React that increased course completion rates by 18% among enrolled students.
- Maintained PostgreSQL databases for student records and compliance documentation, ensuring data integrity across 3 production environments.
- Participated in on-call rotation addressing production incidents, maintaining platform reliability for critical healthcare training systems.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed documentation SDK components in JavaScript for document imaging APIs, improving developer onboarding time by 30%.
- Built sample applications demonstrating integration patterns, reducing customer support tickets related to implementation questions.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
