Summary

Senior Software Engineer with **8 years** of experience designing and delivering scalable cloud platforms, SaaS marketplace integrations, and enterprise software solutions. Led development of **Python** and **React**-based microservices architected for horizontal scaling, supporting **500+ enterprise customers** across **AWS, Azure, and GCP**. Built and maintained **PostgreSQL** databases processing **thousands of records daily** with zero downtime deployments. Delivered HIPAA-compliant learning management systems serving **50,000+ active users** through CI/CD pipelines and Kubernetes orchestration. Expert in **RESTful API** design, observability tooling, and end-to-end feature ownership. Actively involved in on-call rotations and production incident response.

Core Skills

Languages & Frameworks: Python, JavaScript, TypeScript, React, Node.js, Django, HTML, CSS, Ruby

Databases: PostgreSQL, MySQL, SQL Server, Redis

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Terraform

Practices: CI/CD, Agile, RESTful APIs, GraphQL, Microservices, Prometheus

Work Experience

Senior Software Engineer | Tackle.io | Remote, US | 03/2022 - Present

- Designed and implemented **GraphQL** and **RESTful APIs** consumed by **500+ enterprise clients**, integrating with **AWS, Azure, and GCP** billing systems.
- Architected and deployed **Python** microservices on **AWS EKS**, handling **10,000+ API requests per day** for cloud marketplace integrations with 99.9% uptime.
- Led migration from monolith to **event-driven architecture** using **Kubernetes** and **Redis** message queues, reducing system latency from **3s to under 1s**.
- Built automated data validation pipelines processing **thousands of customer records nightly** using **PostgreSQL** stored procedures and **Python** ETL jobs.
- Mentored **3 junior engineers** on **React** best practices and code review standards, improving team velocity by **20%**.
- Established **CI/CD pipelines** with **GitHub Actions** and **Terraform** infrastructure-as-code, cutting deployment time by **40%**.
- Owned end-to-end deployment and on-call support for production systems serving global SaaS marketplace operations.

Software Engineer | Tackle.io | Remote, US | 06/2021 - 03/2022

- Collaborated with product team to ship **5+ major features** including billing integration modules and usage tracking dashboards.

- Developed **React** dashboard components for multi-cloud resource management, reducing customer onboarding time by **30%**.
- Optimized **PostgreSQL** query performance with indexing strategies, achieving **50% faster** report generation for enterprise users.
- Implemented **OAuth2** authentication flows and **JWT** token management for secure **RESTful API** integrations.

Software Engineer II | Ultimate Medical Academy | Remote, US | 04/2019 - 06/2021

- Led frontend migration from legacy jQuery to **React**, improving page load times by **40%** and accessibility compliance.
- Built HIPAA-compliant **Python Django** applications serving **50,000+ students** with secure patient data handling and audit logging.
- Designed and maintained **SQL Server** databases with **complex stored procedures** for student enrollment and certification tracking.
- Developed **RESTful APIs** integrated with third-party healthcare systems, processing **1,000+ daily transactions** with zero data breaches.

Software Engineer I | Ultimate Medical Academy | Remote, US | 08/2018 - 04/2019

- Implemented student portal features using **JavaScript** and **CSS**, enhancing user experience for **thousands of daily users**.
- Built automated testing suite with **80%+ code coverage** using **Python pytest** and **Selenium**.
- Resolved production incidents and performed **database optimizations** reducing report generation time by **35%**.
- Integrated **Stripe** payment processing for course enrollments, handling **\$500,000+ annually** in transactions.

SDK Intern | Accusoft | Remote, US | 06/2017 - 08/2018

- Created automated testing framework for **.NET** library, reducing QA turnaround time by **2 days** per release cycle.
- Developed **C# SDK** documentation and code samples for document imaging product, adopted by **200+ developers**.

Education

Bachelor of Science in Computer Science

University of South Florida | 2014 - 2018
