Summary

Senior Software Engineer with **8 years** of experience designing and delivering full-stack applications across healthcare, SaaS, and enterprise domains. Built compliance-critical platforms serving 90+ health systems and pharmacy operations. Architected **RESTful APIs** with **OAuth2** security, **PostgreSQL** database optimization, and **React**-based frontends. Delivered features using **TypeScript**, **Python**, **Django**, and **Node.js** for multi-tenant B2B environments. Collaborated with cross-functional teams to accelerate delivery cycles and enhance system reliability. Bringing deep full-stack expertise to AI-powered healthcare workflow automation at Plenful. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages and Frameworks: Ruby

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Redux

Backend: Python, Django, Node.js, Express, Flask, REST APIs

Database: PostgreSQL, Redis, SQLite, SQLAlchemy, Elasticsearch

Infrastructure: AWS, Docker, GitHub Actions, CI/CD, Linux

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018

Work Experience

Senior Software Engineer | Tackle.io | Remote, US | 03/2022 - Present

- Led end-to-end development of **cloud-based sales platforms** for 100+ ISV partners, architecting **React** frontends and **Python** microservices that scaled across multi-tenant environments.
- Engineered **RESTful APIs** with **Django** and **Flask**, integrating payment processors and CRM systems while reducing data processing errors by approximately 20%.
- Implemented **OAuth2** authentication flows and **role-based access controls** for enterprise customers, strengthening platform security across all tenant data.
- Designed and optimized **PostgreSQL** schemas and queries for high-traffic SaaS workloads, cutting average response times from 800ms to under 200ms for 500+ daily active users.
- Established **CI/CD pipelines** using **GitHub Actions**, automating build, test, and deployment workflow that reduced release cycles from bi-weekly to 3-day sprints.
- Mentored 3+ junior engineers through code reviews and architectural guidance, fostering adoption of **TypeScript** and **testing best practices** across the team.

Software Engineer | Tackle.io | Remote, US | 06/2021 - 03/2022

- Built and shipped **React** components and **Node.js** services for a multi-tenant B2B platform, supporting onboarding workflows for 50+ new enterprise accounts.
- Contributed to initial architecture of core product infrastructure using **Python**, **Django**, and **PostgreSQL**, establishing patterns adopted by 8+ feature teams.
- Developed **integration endpoints** for third-party CRM platforms, enabling data synchronization that improved sales team productivity metrics by 12%.
- Participated in on-call rotation, diagnosing and resolving production incidents with **Redis** caching layer optimizations that prevented recurring downtime.

Software Engineer II | Ultimate Medical Academy | Remote, US | 04/2019 - 06/2021

- Developed **healthcare education platforms** using **React**, **Node.js**, and **PostgreSQL**, supporting 50,000+ enrolled students across compliance-critical training modules.
- Architected course completion tracking systems with automated workflows, improving student completion rates by 15% and reducing administrative overhead for accreditation reporting.
- Integrated **third-party LMS systems** and payment processors via **RESTful APIs**, streamlining enrollment processes for healthcare certification programs.
- Optimized database queries and implemented caching strategies with **Redis**, reducing page load times from 4s to under 1s for course content delivery.

Software Engineer I | Ultimate Medical Academy | Remote, US | 08/2018 - 04/2019

- Built **student-facing dashboards** and administrative portals using **React** and **Node.js**, serving 10,000+ monthly active users in healthcare training environments.
- Created automated email notification systems with **Python** and **Django**, reducing manual outreach by the student success team by 30%.
- Assisted in migrating legacy PHP systems to modern **JavaScript** stacks, improving maintainability and developer velocity for a team of 5 engineers.

SDK Intern | Accusoft | Remote, US | 06/2017 - 08/2018

- Integrated **document processing SDKs** into client web applications using **JavaScript** and **C#**, cutting document conversion time in half for 200+ enterprise clients.
- Authored technical documentation and code samples for REST API consumption, reducing support ticket volume related to integration questions by 40%.
