Summary

Senior Software Engineer with **8 years** of experience designing and delivering enterprise-grade software solutions across healthcare, SaaS, and developer tooling domains. history of building scalable distributed systems and leading high-performing engineering teams through full product lifecycle. Recognized for architecting secure, HIPAA-compliant platforms serving 500,000+ learners while reducing system latency by 60%. Partners closely with product management and cross-functional stakeholders to translate business requirements into technical roadmaps. Works on using **AWS serverless architecture**, **Python**, and modern DevOps practices to drive operational excellence. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, TypeScript, React, .NET, Node.js, PostgreSQL, Redis, JavaScript, HTML, CSS

Cloud & Infrastructure: AWS, Serverless, Lambda, Terraform, Infrastructure as Code, Docker, Kubernetes

Security & Compliance: HIPAA, OAuth2, DevSecOps, JWT, encryption, audit logging

Platform & Tooling: CI/CD pipelines, GitHub Actions, Datadog, Splunk, RESTful APIs, GraphQL

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Led migration of monolithic backend services to event-driven serverless architecture, achieving 99.9% uptime and decreasing average response time from 3s to under 200ms for 200+ enterprise customers.
- Architected and deployed microservices on AWS Lambda using **Terraform**, reducing infrastructure costs by 40% while improving deployment frequency from weekly to multiple daily releases.
- Integrated Datadog APM and centralized logging, enabling proactive monitoring of 12 production services and reducing mean time to resolution for critical incidents.
- Established comprehensive **CI/CD pipeline** with automated security scanning and compliance checks, reducing manual deployment errors by 80% across 5 development teams.
- Mentored 3 junior engineers through code review standards, architecture decisions, and incident response procedures, fostering growth of team capabilities.
- Designed and implemented **RESTful APIs** with **OAuth2** authentication supporting 50M+ daily transactions for cloud marketplace integration platform.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Built multi-tenant webhook delivery system processing 10M+ events daily with guaranteed ordering and retry mechanisms, improving partner integration reliability.
- Collaborated with product team to define technical specifications for marketplace billing integrations, delivering features 2 weeks ahead of schedule.
- Developed **TypeScript** SDK library consumed by 300+ external developers, incorporating comprehensive API documentation and interactive examples.
- Participated in on-call rotation responding to production incidents, maintaining SLA compliance for core platform services.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Refactored **Python** Flask backend services to microservices architecture, reducing page load times by 60% and enabling horizontal scaling during peak enrollment periods.
- Led development of HIPAA-compliant learning management system serving 500,000+ learners, implementing encryption at rest and audit logging for all PHI access.
- Automated database backup and disaster recovery procedures using AWS snapshots, achieving RPO of under 1 hour for production PostgreSQL clusters.
- Built **React** frontend components for adaptive assessment engine, increasing student completion rates by 25% through personalized learning paths.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed internal reporting dashboard aggregating student engagement metrics, replacing manual Excel workflows and saving 15 hours weekly for academic advising team.
- Implemented single sign-on integration with 8 partner institutions using SAML 2.0, expanding accessible enrollment channels for prospective students.
- Resolved critical production bugs and security vulnerabilities through systematic root cause analysis, maintaining platform trust and regulatory compliance.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Assisted in debugging and resolving customer-reported issues in .NET SDK components, improving library reliability and customer satisfaction scores.
- Contributed to enterprise imaging SDK documentation and sample applications demonstrating document processing capabilities to potential enterprise clients.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
