Summary

Senior Software Engineer with **8 years** of experience in cloud-native development and architectural improvements. Built and owned end-to-end systems at Tackle.io, reducing infrastructure costs by 40% through serverless migration and supporting over 100 ISV partners. Full-stack expertise spans **React**, **TypeScript**, **Python**, and **Node.js** with **AWS** infrastructure. Delivered measurable outcomes in healthcare and education sectors, emphasizing scalable solutions and cross-functional collaboration. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages and Frameworks: Python, JavaScript, TypeScript, React, Node.js, Flask, REST API, GraphQL, HTML, CSS

Cloud and Infrastructure: AWS, Lambda, ECS, RDS, S3, Docker, Kubernetes, Terraform

Database and Data: PostgreSQL, MySQL, Redis

Observability and Practices: Datadog, CloudWatch, Agile, OAuth2, JWT

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Migrated critical services to AWS Lambda, processing over 10,000 daily transactions and reducing infrastructure costs by 40% while improving system scalability.
- Designed and implemented API interfaces using GraphQL and REST, enabling third-party integrations and expanding platform capabilities for partner ecosystems.
- Led transition of monolithic architecture to microservices using Docker and Kubernetes, enhancing deployment flexibility and system reliability.
- Established comprehensive test coverage protocols achieving 85% code coverage, reducing post-deployment bugs and improving overall system reliability.
- Collaborated with cross-functional teams in agile environments, delivering features aligned with product roadmaps and stakeholder requirements.
- Created infrastructure as code using Terraform, streamlining AWS resource provisioning and reducing environment deployment time.
- Conducted code reviews and mentored junior engineers, improving team coding standards and knowledge sharing practices.
- Established monitoring with Datadog, identifying performance bottlenecks and minimizing customer incidents through proactive alerting.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Created Python automation scripts saving the customer success team over 15 hours weekly by eliminating repetitive operational tasks.
- Developed partner onboarding portal using TypeScript and React, improving activation rates and reducing manual administrative review cycles.
- Integrated third-party SaaS platforms via REST APIs, expanding platform functionality and providing users with enhanced capabilities.

- Maintained PostgreSQL database systems ensuring data integrity and query performance for critical business operations.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Optimized MySQL database queries, reducing page load times from 5 seconds to 1.5 seconds and enhancing user experience for learners.
- Built Python Flask APIs for student assessment and progress tracking, enabling personalized learning pathways and data-driven educational outcomes.
- Developed React and TypeScript-based learning management system features supporting over 50,000 students and improving course completion rates.
- Collaborated with instructional designers to implement accessibility standards, ensuring WCAG 2.1 compliance across web applications.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Implemented JSON web token authentication securing student data and maintaining FERPA compliance in healthcare education platforms.
- Resolved production issues and maintained healthcare education platform systems with 99.9% uptime for student learning continuity.
- Developed TypeScript components for administrative dashboards, improving staff efficiency and enabling better student management capabilities.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed automated test suites using pytest, improving SDK code coverage and catching regressions early in development cycles.
- Created SDK documentation and code samples, reducing support tickets and helping developers integrate imaging solutions effectively.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
