Summary

Senior Software Engineer with **8 years** of experience designing and building cloud platforms and SaaS applications. Specializes in **Python, TypeScript, React, AWS, PostgreSQL, FastAPI, GraphQL, and Kubernetes**. Led development of multi-tenant SaaS platform serving **500+ enterprise customers**, designing and maintaining microservices with FastAPI. Built and maintained cloud infrastructure on **AWS** using Terraform, reducing deployment time by **40%** and improving system reliability. Partnered with product and clinical teams at Ultimate Medical Academy to modernize healthcare education platform serving **50K+ students**, improving performance by **80%**. Works on building healthcare AI products and scalable platform solutions.

Core Skills

Backend: Python, FastAPI, Flask, Node.js, REST APIs, GraphQL, Django

Frontend: React, TypeScript, JavaScript, HTML, CSS, WebSockets

Data: PostgreSQL, Redis, Data Modeling, HIPAA-Compliant Data Pipelines

Infrastructure: AWS, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions

Tools: Git, Agile/Scrum, OAuth2, JWT Authentication, Cloud Marketplace Integration

Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Led development of multi-tenant SaaS platform serving 500+ enterprise customers, designing and maintaining microservices with **Python** and **FastAPI**. Architected scalable backend services handling marketplace transactions and customer onboarding workflows.
- Designed and deployed microservices on **AWS** using **Terraform** and **Kubernetes**, improving deployment frequency from weekly to daily releases and reducing infrastructure costs by **40%**.
- Built secure **RESTful** and **GraphQL APIs** with **OAuth2** and JWT authentication for marketplace integrations with **AWS** and **Azure**, enabling automated vendor workflows.
- Developed **React** and **TypeScript** frontend components for marketplace listing management, serving 500+ enterprise customers and improving user engagement metrics.
- Established code review practices and mentored **3 junior engineers**, reducing production incidents by **25%** and accelerating onboarding for new team members.
- Collaborated with product and design teams to ship **5+ marketplace features** based on customer feedback and analytics, increasing platform adoption rates.
- Created **CI/CD pipelines** with **GitHub Actions** and **Docker**, cutting release cycles from 3 hours to under 1 hour and improving deployment reliability.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Built marketplace integrations on **AWS** connecting to **AWS Marketplace** and **Azure Marketplace** APIs, enabling automated workflows for 100+ software vendors.
- Implemented **CI/CD pipelines** with **GitHub Actions**, reducing deployment time from 3 hours to under 1 hour through automated testing and zero-downtime deployments.
- Built and maintained **REST** and **GraphQL APIs** with **OAuth2** and JWT authentication, enabling secure third-party integrations and partner ecosystem growth.
- Maintained **PostgreSQL** databases, optimizing queries for customer-facing applications and reducing latency by **30%** for marketplace operations.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built web-based learning platform with **Python** and **Flask** serving **50K+ students** and 200+ educators, handling course content, enrollment, and assessments.

- Modernized legacy **Django** code to **Flask** and **React**, accelerating feature development cycles by **60%** and improving platform reliability.
- Implemented Redis caching reducing API response times from 2 seconds to under 200 milliseconds for course and enrollment endpoints, improving student experience.
- Established CI/CD practices and automated testing with **Docker**, improving deployment reliability and reducing manual effort across the engineering team.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed responsive student dashboard interface using **React** and JavaScript for enhanced mobile learning experiences serving thousands of students.
- Built interactive course content components with **React** and JavaScript, improving student engagement and completion rates for online medical education programs.
- Migrated on-premises services to **AWS** EC2 and S3, reducing infrastructure costs by **\$5,000** annually and improving system availability.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed code samples and API documentation for imaging SDK across multiple programming languages, supporting developer adoption and customer onboarding.
- Tested and debugged imaging SDK components on Windows and web platforms, identifying and resolving critical issues prior to major release milestones.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
