Summary

Senior Software Engineer with **8 years** of experience building enterprise-grade SaaS platforms and backend systems. At Tackle.io, architected multi-tenant cloud marketplace solutions handling complex billing integrations and API ecosystems for enterprise customers. Led migration of monolithic services to microservices architecture, improving deployment frequency and system reliability. Mentored team of **4 engineers** and established development standards reducing code review cycle time by **30%**. Partnered with product and infrastructure teams to define technical roadmap and drive platform modernization. Works on using ServiceNow development expertise to deliver enterprise ITSM solutions and workflow automation.

Core Skills

Languages & Frameworks: JavaScript, TypeScript, Python, Node.js, SQL, HTML, CSS

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD

Databases: PostgreSQL, MySQL, Redis, MongoDB

Tools & Practices: Git, Agile, REST APIs, Linux, Jira

Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and developed backend services for cloud marketplace platform, designing RESTful APIs that integrated with multiple billing providers and reduced transaction processing time by **40%**.
- Led migration of legacy Express.js monolith to microservices architecture using Docker and Kubernetes, enabling horizontal scaling and improving system uptime to **99.9%**.
- Implemented authentication and authorization system using OAuth2 and JWT, securing **500+** enterprise customer accounts and meeting compliance requirements.
- Mentored team of **4 engineers** through pair programming, code reviews, and technical design sessions, establishing coding standards and best practices.
- Optimized database queries and implemented caching layer with Redis, reducing average API response time from **200ms to 80ms**.
- Collaborated with product managers to translate business requirements into technical specifications, delivering **15+** new features per quarter.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed and maintained RESTful APIs using Node.js and Express, processing **1M+** requests daily for customer billing and subscription management.

- Built automated testing suite with Jest, increasing code coverage from **60% to 85%** and reducing production bugs.
- Designed and implemented webhooks system for real-time partner integrations, improving data synchronization latency by **60%**.
- Participated in on-call rotation and resolved critical incidents, maintaining **99.5%** platform availability.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed web applications for healthcare education platform using JavaScript and Python, serving **10,000+** students and educators.
- Built data migration pipeline transforming legacy student records to new learning management system, converting **50,000+** records.
- Implemented automated reporting system using SQL and Python scripts, reducing manual reporting time by **70%**.
- Collaborated with compliance team to ensure HIPAA compliance in data handling processes and documentation.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed frontend components using JavaScript and React for student enrollment and course management features.
- Created backend APIs using Node.js to support student portal functionality and data retrieval.
- Assisted in database design and optimization, improving query performance for reporting dashboards.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed sample applications demonstrating SDK integration with document imaging features.
- Created technical documentation and code examples for developer onboarding.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
