Summary

Senior Software Engineer with **8 years** of experience engineering full-stack web applications across SaaS, healthcare, and developer tools. Owns end-to-end development of cloud-native platforms at Tackle.io, delivering marketplace solutions for **AWS**, **Azure**, and **GCP** partners. Built mission-critical student management systems serving 15,000+ learners at Ultimate Medical Academy. Led cross-functional teams of 5+ engineers while maintaining on-call rotations. Seeks to architect scalable backend services with **Node.js** and high-performance interfaces using **React**. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Scripting: Node.js • Express • REST APIs • GraphQL • PostgreSQL • Python, React • Next.js • TypeScript • HTML5 • CSS3 • Redux, TypeScript, JavaScript, HTML, CSS, SQL, Python

Systems & Networking: AWS • Azure • GCP • Docker • Kubernetes • CI/CD Pipelines, Git • Agile • Microservices • OAuth2 • Jest • Testing

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and deployed cloud marketplace integrations for **AWS**, **Azure**, and **GCP** ecosystems, enabling ISV partners to list and sell software through major cloud portals with automated billing workflows.
- Designed **Node.js** microservices handling high-throughput transaction processing, reducing API response times from 3s to under 800ms for enterprise customers processing 30+ concurrent requests.
- Built reusable component libraries with **React** and **TypeScript** for the frontend dashboard, improving developer velocity by enabling rapid prototyping across 3 product teams.
- Mentored 4 junior engineers through code reviews and pair programming sessions, promoting best practices for **REST API** design and **CI/CD** deployment automation.
- Led migration of legacy monolith to **Kubernetes**-ran containers on **GCP**, cutting infrastructure costs by 30% while improving deployment frequency from weekly to daily releases.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Collaborated with product and design teams to ship 5 new feature releases including the partner onboarding flow, shortening time-to-listing for ISVs by 3 business days.
- Created integration testing frameworks using **Jest** that covered 80%+ of codebase, reducing regression bugs in production by 25% across 6 sprint cycles.
- Optimized **PostgreSQL** query performance through indexing strategies and query restructuring, improving report generation speeds from 45s to 8s for large datasets.
- Developed **GraphQL** APIs powering real-time marketplace analytics dashboards, aggregating data from multiple cloud provider billing systems into unified customer views.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed **Python** scripts for ETL processes migrating legacy student records to new cloud-hosted databases, successfully transferring 8 years of historical data without data loss.
- Engineered student information portals using **React** and **Node.js** serving 15,000+ learners, implementing accessibility standards (WCAG 2.1) for ADA compliance across all course interfaces.
- Designed **RESTful APIs** integrating third-party payment gateways and financial aid systems, reducing payment processing errors by 60% and improving student billing transparency.
- Built automated enrollment pipelines processing 500+ student registrations daily, replacing manual paper-based workflows and saving 40 hours weekly for administrative staff.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Maintained and enhanced legacy course delivery platform using **React** components, resolving 20+ critical bug tickets within first 3 months and improving page load performance by 35%.
- Implemented automated email notification system using **Node.js** schedulers, notifying students of assignment deadlines and upcoming live sessions with 95% delivery success rate.
- Contributed to **Agile** sprint planning and daily standups as part of 6-member cross-functional team delivering monthly platform updates.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Built automated testing suites in **JavaScript** validating SDK functionality across browser environments, reducing manual QA cycles by 15 hours per release.
- Developed code samples and documentation for **REST API** integrations demonstrating document imaging SDK capabilities to 100+ enterprise developer clients.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
