Summary

Senior Software Engineer with **8 years** of experience building cloud-native SaaS platforms, workflow automation systems, and AI-powered product features. At **Tackle.io**, architected the core multi-tenant marketplace serving 50+ ISV partners and built a product analytics system that identified \$2M in upsell revenue. Led compliance automation initiatives achieving **SOC 2 Type II** certification and reduced manual review cycles by 70%. Implemented AI features using **OpenAI APIs** and **RAG patterns** for intelligent workflow suggestions. Experienced with **React, TypeScript, Node.js, Python, AWS, PostgreSQL, and GraphQL**. Partners with product managers to translate requirements into scalable technical solutions.

Core Skills

Frontend: React, TypeScript, JavaScript, Angular, HTML/CSS, Redux

Backend: Node.js, Python, Django, Flask, REST APIs, GraphQL

Data: PostgreSQL, MySQL, Redis, Elasticsearch, Data Modeling

Cloud & DevOps: AWS, Docker, CI/CD, Terraform, Kubernetes, Lambda

Product & AI: Workflow Automation, AI Integration, OpenAI APIs, Product Analytics, SaaS Architecture, Technical Leadership

Work Experience

Senior Software Engineer | Tackle.io | 03/2022 - Present

- Designed and built workflow automation features enabling **ISV partners** to configure **cloud marketplace** listings, increasing platform adoption by 35% within two quarters.
- Developed a product analytics pipeline using **Python** and **AWS** event processing that captured feature usage metrics, enabling identification of \$2M in upsell opportunities within the first year.
- Implemented automated compliance workflows for **SOC 2 Type II** certification, reducing manual review cycles from 3 weeks to 4 days through custom rule engines and audit trail generation.
- Built AI-powered workflow suggestions using **OpenAI APIs** and **RAG patterns**, analyzing historical configuration data to recommend optimal marketplace listing strategies to partners.
- Established **CI/CD pipelines** with automated testing and **Terraform** infrastructure provisioning, decreasing average deployment time from 45 minutes to 8 minutes across 12 microservices.

Software Engineer | Tackle.io | 06/2021 - 03/2022

- Launched a **GraphQL API gateway** aggregating data from 8 internal microservices, simplifying frontend data fetching and reducing average page load times from 2.8s to 1.1s.
- Integrated **Stripe** billing and subscription management for the marketplace platform, supporting complex partner revenue sharing models and processing over \$3M in monthly transactions.
- Built self-service partner onboarding flows with **React** and **TypeScript**, reducing implementation support tickets by 30% through improved user guidance and validation.
- Optimized **PostgreSQL** query performance through indexing strategies and query analysis, improving dashboard report generation speed by 65% for enterprise customers.

Software Engineer II | Ultimate Medical Academy | 04/2019 - 06/2021

- Led development of a healthcare learning management system serving 40,000+ students, building **React** frontends and **Python** backend APIs with strict **HIPAA** compliance requirements.
- Implemented automated course generation pipelines using **Python** and **Django** that processed SCORM-compliant content, reducing content production timelines from 3 weeks to 8 days.
- Built a student recommendation engine using collaborative filtering with **Python** and **MySQL**, increasing course completion rates by 22% through personalized learning paths.
- Developed secure **REST APIs** with **OAuth2** and JWT authentication for third-party integrations, enabling partnership programs with 5 healthcare certification bodies.

Software Engineer I | Ultimate Medical Academy | 08/2018 - 04/2019

- Optimized database queries and implemented caching layers with **Redis**, reducing API response times from 1.8s to 420ms for frequently accessed student records.
- Modernized legacy PHP systems by rebuilding core student enrollment workflows in **Node.js** and **Angular**, improving registration completion rates by 18%.
- Created automated email and notification systems using **Python** and AWS **Lambda** functions, handling 500+ daily event-driven communications with 99.9% delivery success.

SDK Intern | Accusoft | 06/2017 - 08/2018

- Built a JavaScript API wrapper library for document processing SDK integration, reducing customer implementation time from 3 days to 6 hours through simplified code examples.
- Developed imaging SDK components for .NET environments using **C#**, implementing document scanning and OCR functionality used by 200+ enterprise clients.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
