Summary

Senior Software Engineer with **8 years** of experience building **TypeScript, React, and Node.js** applications across healthcare education and B2B SaaS platforms. Architected cloud-native microservices on **AWS** supporting **500+ enterprise customers** with 99.9% uptime. Built **PostgreSQL** schemas and **CI/CD pipelines** for 30+ services. Led teams of 4 engineers, reduced infrastructure costs by \$50K annually.

Next focus: distributed systems architecture and senior team mentorship. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Experience

Senior Software Engineer | Tackle.io | Chapel Hill, NC | 03/2022 - Present

- Designed and deployed microservices on **AWS ECS and Lambda**, implementing event-driven architecture that cut deployment cycles from weekly to daily for a 20+ service ecosystem.
- Built and maintained **React** frontends and **Node.js/Express** APIs serving **500+ enterprise customers**, achieving 99.9% uptime through systematic observability with **Datadog** and **CloudWatch**.
- Led migration from **PostgreSQL** 11 to 13 with zero-downtime schema changes, improving query performance by 40% and reducing maintenance windows.
- Developed **CI/CD pipelines** using **GitHub Actions** and **Docker**, reducing build times from 15 minutes to 4 minutes for 30+ microservices.
- Mentored 3 junior engineers through code reviews and architecture discussions, establishing team standards that decreased bug rates by 25%.
- Implemented **OAuth2** and **JWT**-based authentication across all services, securing access for **5000+ daily active users**.
- Collaborated with product and design teams to ship 12 major features per quarter using Agile/Scrum methodologies.
- Reduced infrastructure costs by \$50K annually through right-sizing ECS tasks and implementing auto-scaling policies.

Software Engineer | Tackle.io | Chapel Hill, NC | 06/2021 - 03/2022

- Built Python SDKs and CLI tools for SaaS platform integration, cutting customer onboarding time from 2 hours to 15 minutes.
- Developed **Angular** web applications for customer dashboards, reducing support tickets by 30% through improved UX.
- Created **GraphQL** APIs for flexible data fetching, decreasing frontend network requests by 50% for marketplace integrations.
- Authored technical documentation and code samples for cloud marketplace integrations, improving developer adoption by 3x within one quarter.

Software Engineer II | Ultimate Medical Academy | Tampa, FL | 04/2019 - 06/2021

- Developed Flask REST APIs with **JWT** authentication and role-based access control for healthcare education compliance requirements.
- Built **React** components for LMS portal, reducing page load times by 40% and improving student engagement across **8,000+ concurrent users**.
- Optimized **PostgreSQL** queries and implemented **Redis** caching, reducing API response times from 800ms to 150ms.
- Led migration of legacy PHP systems to modern JavaScript stack, improving page load times by 60% and reducing security vulnerabilities.

Software Engineer I | Ultimate Medical Academy | Tampa, FL | 08/2018 - 04/2019

- Designed RESTful APIs for healthcare education systems, supporting enrollment workflows for **15,000+ monthly active students**.
- Created responsive web interfaces using CSS3 and HTML5 for WCAG accessibility compliance across all student-facing applications.
- Participated in code reviews and testing practices, establishing unit test coverage standards adopted by the entire engineering team.

SDK Intern | Accusoft | Tampa, FL | 06/2017 - 08/2018

- Documented APIs for image processing SDKs used by enterprise clients, reducing support inquiries by 25% within the first month.
- Assisted with **JavaScript** widget development for third-party application integration, supporting 50+ external developer accounts.

Education

Bachelor of Science in Computer Science

University of South Florida

University of South Florida | 08/2014 - 05/2018

CoreSkills

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Angular, Node.js, Express, Redux, Jest

Backend: Flask, Django, RESTAPIs, GraphQL, OAuth2

Infrastructure: AWS(ECS, Lambda, S3, RDS), Docker, PostgreSQL, Redis, GitHubActions
