Summary

Senior Software Engineer with **8 years** of experience building scalable backend systems and data pipelines for B2B SaaS and healthcare platforms. Led development of **RESTful APIs** handling high-volume transaction processing, designed **PostgreSQL** database schemas supporting 30+ integrated applications, and architected **CI/CD pipelines** reducing deployment cycles from days to under 2 hours. Collaborated with cross-functional teams of 5+ engineers to deliver cloud-native solutions on **AWS** and **Azure**. Seeking to leverage expertise in distributed systems and data engineering at a location intelligence organization. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, JavaScript, TypeScript, React, Node.js, Django, FastAPI, GraphQL, HTML, CSS

Databases: PostgreSQL, MySQL, Redis, Elasticsearch, MongoDB

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, GitHub Actions, CircleCI

Data & Analytics: RESTful APIs, ETL Pipelines, Apache Kafka, Spark, Airflow

Tools & Practices: Agile, Git, JIRA, Datadog, Splunk, OAuth2, SSL/TLS

Work Experience

Senior Software Engineer | Tackle.io | 03/2022 - Present

- Led migration of monolithic application to microservices architecture on **AWS EKS**, improving system uptime to 99.9% and enabling horizontal scaling during peak load.
- Designed **GraphQL** gateway handling 200+ concurrent requests, decreasing average response time from 3s to under 800ms through caching and query optimization.
- Implemented **CI/CD pipelines** with GitHub Actions reducing deployment cycles from 4 hours to under 2 hours while maintaining zero-downtime releases.
- Architected and built marketplace enablement platform processing \$50M+ monthly transactions, integrating **Stripe** payment systems with multi-tenant SaaS products.
- Built real-time analytics dashboard using **React** and **PostgreSQL** providing visibility into marketplace metrics for 100+ ISV partners.
- Established API security standards including **OAuth2** and **JWT** authentication, achieving SOC 2 compliance for enterprise customers.
- Mentored team of 3 junior engineers on **Python** best practices and distributed systems design patterns.
- Developed automated testing suite achieving 85% code coverage across critical payment processing modules.

Software Engineer | Tackle.io | 06/2021 - 03/2022

- Constructed **RESTful APIs** with **FastAPI** for SaaS product listing management, supporting CRUD operations across 30+ integrated applications.
- Collaborated with product team to define API specifications and deliver features on schedule for Q4 product launch.
- Implemented webhook delivery system with retry logic handling 10,000+ events daily with 99.5% successful delivery rate.
- Optimized **PostgreSQL** queries reducing database load by 40% through indexing strategies and query plan analysis.

Software Engineer II | Ultimate Medical Academy | 04/2019 - 06/2021

- Built ETL pipelines extracting data from **MySQL** and **Salesforce**, transforming 50+ GB of records into analytics-ready datasets.
- Modernized student enrollment system processing 5,000+ monthly registrations by rebuilding backend with **Django** and **PostgreSQL**.
- Deployed containerized applications to **AWS ECS** with **Terraform** infrastructure-as-code, reducing server costs by \$8,000 annually.
- Implemented SSL certificate automation and monitoring alerts, achieving 100% compliance with FERPA data security requirements.

Software Engineer I | Ultimate Medical Academy | 08/2018 - 04/2019

- Developed internal reporting dashboard using **Python** and **React** for student performance tracking across 15 academic programs.
- Created automated email notification system reducing manual communication overhead by 60% for enrollment operations team.
- Maintained legacy **PHP** codebase while migrating core modules to modern **Node.js** microservices architecture.

SDK Intern | Accusoft | 06/2017 - 08/2018

- Contributed to image processing SDK development in **C#** and **.NET**, documenting API usage examples for enterprise customers.
- Automated SDK testing workflows using **Python** scripts, cutting manual regression testing time by 25% for release cycles.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
