Summary

Senior Software Engineer with **8 years** of experience building cloud-native applications and developer tools. Led end-to-end development of SDKs and APIs serving enterprise clients, developed educational technology platforms supporting 50,000+ students, and created imaging processing pipelines. Expert in **Python, AWS, React, and TypeScript** with a history of delivering high-quality software on time. Skilled at translating complex requirements into scalable solutions across healthcare, developer tools, and SaaS domains. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: Python, TypeScript, JavaScript, Java, C#, SQL

Frontend: React, Next.js, Redux, HTML5, CSS3

Backend: Node.js, REST APIs, GraphQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Terraform

Tools & Practices: Git, Jira, Agile/Scrum, Testing Frameworks, Microservices

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Implemented **CI/CD pipelines** using GitHub Actions and **AWS CodePipeline**, decreasing deployment time by 60% and eliminating manual release steps across 5 teams.
- Built and maintained **RESTful APIs** with **Python** and **GraphQL**, handling authentication via **OAuth2** and processing 1M+ requests daily with sub-100ms latency.
- Designed **PostgreSQL** database schemas and optimized queries, reducing report generation time from 45 seconds to 3 seconds for key business intelligence dashboards.
- Architected and deployed multi-tenant SaaS platform components using **React** and **Node.js**, supporting 200+ enterprise software vendors in managing go-to-market workflows.
- Led migration of monolithic services to **microservices architecture** using **Docker** and **Kubernetes**, improving system reliability to 99.9% uptime.
- Mentored 3 junior engineers through code reviews and pair programming sessions, establishing team coding standards and documentation practices.
- Developed real-time analytics features using **Redis** caching and WebSocket connections, enabling live dashboard updates for sales teams.

- Collaborated with product managers to define sprint priorities and technical roadmaps, delivering 30+ customer-facing features per quarter.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Created integration layer connecting **AWS** services with third-party CRM platforms, enabling automated data synchronization for 50+ enterprise accounts.
- Developed unit and integration tests achieving 85% code coverage, reducing production bugs by 40% in the first quarter.
- Built internal tooling with **Python** scripts automating data migrations, saving 20+ hours monthly for operations team.
- Participated in on-call rotation responding to production incidents, maintaining SLA compliance for critical customer workflows.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed backend services with **Node.js** and **PostgreSQL** handling course enrollment, progress tracking, and certification workflows with 99.5% uptime.
- Implemented video streaming integration with adaptive bitrate playback, reducing buffering by 70% for mobile learners on limited bandwidth.
- Built **React**-based learning management system features serving 50,000+ students and 500+ instructors across healthcare certification programs.
- Created automated compliance reporting system for accreditation requirements, eliminating 15 hours weekly of manual data compilation.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Developed interactive assessment modules with **JavaScript** and **TypeScript** for exam preparation, improving student pass rates by 25%.
- Built email notification system processing 10,000+ daily messages with personalized content based on user learning paths.
- Refactored legacy **jQuery** components to modern **React**, reducing page load times by 40%.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Contributed to **SDK** documentation and sample applications demonstrating image processing capabilities to 1,000+ developers.
- Built automated testing suite for barcode recognition features, catching 12 critical bugs before release.

Education

Bachelor of Science in Computer Science
University of South Florida
08/2014 - 05/2018
