Summary

Senior Software Engineer with **8 years** of experience building scalable backend systems and developer-facing platforms. Led development of **RESTful APIs** and **SDKs** serving enterprise customers across healthcare and SaaS domains. Designed and maintained **cloud infrastructure** on **AWS** supporting high-throughput workloads. Collaborated with cross-functional teams including product, design, and customer success to deliver mission-critical features. Seeking to apply deep backend engineering expertise to build AI search infrastructure at scale. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: Python, Go, Java, JavaScript, TypeScript, HTML, CSS

Backend & APIs: RESTful APIs, GraphQL, PostgreSQL, Redis, Elasticsearch, ORM frameworks

Cloud & Infrastructure: AWS, Docker, Kubernetes, Terraform, CI/CD pipelines, serverless architectures

SDKs & Developer Tools: SDK development, API versioning, documentation, OpenAPI specifications, SDK integration patterns

Security & Authentication: OAuth2, JWT, role-based access control, secure coding practices

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and deployed **backend microservices** on **AWS** using **Python** and **Go**, improving system reliability and reducing deployment failures by 40%.
- Built and shipped **SDKs** in multiple languages (Python, Java, JavaScript) with comprehensive documentation, reducing customer integration time from weeks to days.
- Led migration of legacy monolithic services to containerized **Kubernetes** clusters, achieving 99.9% uptime and enabling horizontal scaling during traffic spikes.
- Collaborated with a cross-functional team of 8 engineers to deliver a new billing platform handling \$10M+ in annual transactions securely.
- Implemented **PostgreSQL** database optimization strategies including query indexing and connection pooling, decreasing average response latency from 800ms to 120ms.
- Established API versioning strategies and deprecation policies ensuring backward compatibility for enterprise customers during major platform releases.
- Designed and maintained **RESTful APIs** with **OAuth2** authentication serving 500+ enterprise customers, enabling smooth third-party integrations.
- Mentored 3 junior engineers on backend development best practices, code review standards, and incident response procedures.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Participated in on-call rotation responding to production incidents, achieving mean time to resolution under 30 minutes for critical issues.
- Developed backend features for **cloud marketplace integrations** using **Python** and **AWS Lambda**, processing thousands of daily transactions.

- Integrated third-party payment and subscription APIs, ensuring compliance with PCI-DSS requirements for handling sensitive customer data.
- Created automated testing frameworks with 85% code coverage, reducing production bugs and improving deployment confidence.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built and maintained **backend services** for a healthcare education platform serving 50,000+ students using **Python** and **Django**.
- Developed internal REST APIs for student enrollment and course management workflows, reducing manual processing time by 60%.
- Implemented caching layers with **Redis** to optimize API response times for high-traffic endpoints during peak enrollment periods.
- Designed **database schemas** and implemented **PostgreSQL** migrations supporting complex reporting and analytics requirements.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Contributed to development of student-facing web applications and **backend APIs** supporting learning management system features.
- Participated in agile ceremonies and sprint planning, delivering features on time for regulatory compliance deadlines.
- Wrote unit and integration tests achieving 80% code coverage across multiple microservices.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Assisted in development and testing of **SDK** components for document imaging and processing libraries.
- Contributed to API documentation and sample code implementations for developer onboarding.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
