Summary

Senior Software Engineer with **8 years** of experience designing and delivering scalable backend systems and data-intensive applications. Built and maintained cloud marketplace services processing high-volume transactions at Tackle.io and developed educational platforms serving thousands of concurrent users at Ultimate Medical Academy. Demonstrated expertise in **Python**, **React**, **PostgreSQL**, and **AWS** infrastructure with a history of reducing system latency through strategic caching implementations. Collaborated with 5+ cross-functional teams to ship customer-facing features on time. Works on building reliable data pipelines and developer-facing tools that power modern software ecosystems. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages and Frameworks: HTML, CSS

Backend Development: Python, FastAPI, Flask, microservices architecture, GraphQL, RESTful API design

Database & Data Infrastructure: PostgreSQL, MySQL, Redis, data pipeline development, database optimization

Cloud & DevOps: AWS, Docker, CI/CD pipelines, infrastructure as code, cloud services integration

Frontend & Full Stack: React, TypeScript, JavaScript, responsive web application development

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and maintained backend services for a cloud marketplace platform processing software transactions across multiple cloud providers including AWS, Azure, and GCP.
- Led development of product onboarding workflows serving 200+ enterprise customers, collaborating with product and design teams to deliver features on schedule.
- Improved system performance through **Redis** caching strategies and query optimization, decreasing average API response time from 3s to under 800ms.
- Developed and secured **RESTful APIs** with **OAuth2** authentication, implementing role-based access controls that reduced unauthorized access attempts by 40%.
- Mentored 3 junior engineers through code reviews and pair programming sessions, establishing team coding standards and documentation practices.
- Designed **GraphQL** schema definitions and resolvers enabling flexible data fetching patterns for frontend applications consuming marketplace data.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Implemented automated testing pipelines covering unit, integration, and end-to-end scenarios, increasing code coverage from 45% to 78% within 1 year.
- Developed internal tooling scripts in **Python** automating repetitive operational tasks, saving approximately 15 hours per week for the engineering team.
- Built customer-facing **React** interfaces integrated with **Python** backend services, delivering responsive dashboards for SaaS vendor management.
- Contributed to **AWS** infrastructure provisioning using Terraform, supporting deployment of containerized applications across multiple environments.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Developed full-stack features for healthcare education platforms using **React**, **Python**, and **PostgreSQL**, serving 50,000+ enrolled students.

- Optimized database queries and implemented caching layers that reduced page load times by 35%, improving student engagement metrics.
- Maintained and enhanced **CI/CD pipelines** using Jenkins and GitHub Actions, reducing deployment failures by 25% across production environments.
- Built **data pipeline** integrations connecting student information systems with learning management platforms using **API design** standards.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Wrote comprehensive test suites achieving 70% code coverage, improving release confidence and reducing production bug reports by 20%.
- Developed **RESTful APIs** for student enrollment and course completion tracking, enabling real-time progress monitoring for administrators.
- Collaborated in **agile** sprint ceremonies including planning, daily standups, and retrospectives to deliver iterative feature releases.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Developed software development kit components in **C#** and **Java** for document processing and image manipulation libraries.
- Created developer documentation and code samples supporting SDK adoption across enterprise client implementations.

Education

Bachelor of Science in Computer Science

University of South Florida

08/2014 - 05/2018
