Summary

Senior Software Engineer with **8 years** of experience building scalable backend services, internal platforms, and automation frameworks across SaaS, marketplace, and ed-tech domains. Architected **RESTful APIs** and **orchestration workflows** supporting enterprise customers and cloud marketplace partners. Delivered measurable outcomes including reduced operational overhead through automation and improved system reliability. Collaborated with cross-functional teams to design systems handling **high-volume transaction processing** and partner integrations. Bringing full-stack expertise and ownership mindset to enterprise application engineering challenges at the intersection of automation and intelligent workflows. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, JavaScript, TypeScript, Node.js, Django, FastAPI, HTML, CSS, SQL

Cloud & Infrastructure: AWS, GCP, Kubernetes, Docker, Terraform, CI/CD Pipelines

APIs & Integration: RESTful APIs, GraphQL, OAuth2, JWT, Webhooks, Marketplace APIs

Development Practices: Agile/Scrum, Test-Driven Development, Microservices Architecture, System Design, Performance Optimization

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and deployed backend microservices handling marketplace integrations for **AWS**, **Azure**, and **GCP Marketplace**, supporting 50+ enterprise ISV partners in automated revenue operations.
- Created internal tooling for partner onboarding workflows, decreasing setup time from 3 days to 4 hours through automated validation pipelines.
- Built **Python**-based API services processing high-volume transaction data with sub-100ms latency requirements, serving 10,000+ daily API calls.
- Implemented **OAuth2** and **JWT** authentication flows for secure partner API access and webhook event processing across multi-tenant environments.
- Established **CI/CD pipelines** with comprehensive test coverage, reducing production incidents by 40% and improving mean time to recovery.
- Led migration of monolithic services to containerized **Kubernetes** architecture, improving deployment frequency from weekly to daily releases.
- Participated in on-call rotation maintaining 99.9% service availability for mission-critical marketplace operations serving 3 enterprise clients.
- Developed automation frameworks reducing manual provisioning tasks by 15 hours weekly through intelligent workflow orchestration.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Integrated third-party payment processing including **Stripe API** for subscription management and revenue tracking across partner accounts.
- Built customer-facing dashboard features using **React** and **Node.js** for partner performance monitoring and analytics visualization.
- Collaborated with product team to design and implement webhook-driven event architecture supporting 25+ integration endpoints.
- Developed **RESTful APIs** enabling real-time data synchronization between marketplace platforms and internal billing systems.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Built automated grading system for assessment processing, decreasing evaluation time from 2 hours to 15 minutes for 500+ submissions daily.
- Designed course management system handling 10,000+ concurrent users with **Django** backend and **PostgreSQL** database optimization.
- Developed mobile-responsive web application using **Python** and **JavaScript**, improving student engagement metrics by 25%.
- Implemented student information workflows reducing administrative overhead by 30% through automated data processing pipelines.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Maintained and enhanced learning management system features supporting 8,000+ enrolled students across multiple academic programs.
- Assisted with database optimization and query performance tuning, reducing page load times by 35%.
- Collaborated on curriculum delivery platform improvements, implementing video streaming integration for asynchronous learning.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Contributed to document imaging **SDK** documentation and sample applications demonstrating API capabilities for enterprise clients.
- Supported integration testing for image processing libraries, validating functionality across 10+ document format variations.

Education

Bachelor of Science

University of South Florida | 2014 - 2018
