Summary

Senior Software Engineer with **8 years** of experience designing, building, and maintaining end-to-end software solutions across EdTech and SaaS domains. Architected and delivered **RESTful APIs, React** frontends, and **Python** data processing systems supporting **50,000+ monthly active users** across healthcare certification and enterprise sales platforms. Led migration of legacy monolithic applications to microservices architecture, improving deployment frequency and system maintainability. Collaborated with product managers and QA teams to ship **12+ major releases** while improving system reliability and reducing incident response time. Bringing strong fundamentals in backend systems design and data pipeline development to a data-intensive engineering team.

Core Skills

Languages & Frameworks: Python, JavaScript, C#, React, Node.js, Django, TypeScript, HTML, CSS

Cloud & Infrastructure: AWS, Docker, Kubernetes, CI/CD Pipelines

Databases: PostgreSQL, MySQL, Redis

Tools & Practices: Git, RESTful APIs, Agile, Jira

Work Experience

Senior Software Engineer | Tackle.io | 03/2022 - Present

- Architected and built **RESTful APIs** using **Python** and **FastAPI**, enabling smooth marketplace integrations that processed over **\$2M** in monthly transactions and reduced integration development time by **30%** for the sales team.
- Designed and implemented **React** frontend components for the seller dashboard, creating intuitive interfaces that improved user engagement metrics and reduced support tickets related to listing management.
- Led migration of monolithic backend services to containerized **microservices** architecture using **Docker** and **Kubernetes**, improving deployment frequency and system uptime while reducing infrastructure costs.
- Developed data processing pipelines using **Python** and **AWS Lambda**, automating data synchronization across multiple marketplace platforms and eliminating manual data entry.
- Collaborated with product and data teams to design **PostgreSQL** database schemas, implementing indexing strategies that reduced average API response time from **3s to 200ms**.

Software Engineer | Tackle.io | 06/2021 - 03/2022

- Implemented **TypeScript** type definitions and automated testing using **Jest**, increasing test coverage and reducing production bugs through comprehensive unit and integration testing strategies.
- Built and maintained **Node.js** backend services for marketplace integration APIs, supporting **15+ cloud marketplace** connections and handling high request volumes with minimal downtime.
- Participated in on-call rotation and incident response for production systems, quickly resolving critical issues while documenting incidents for future prevention strategies.

- Developed **GraphQL** resolvers for efficient data fetching on the frontend, optimizing page load performance and reducing over-fetching of data.

Software Engineer II | Ultimate Medical Academy | 04/2019 - 06/2021

- Architected **Django** REST APIs for healthcare certification tracking system, serving **50,000+ students** and reducing data processing time through efficient backend architecture.
- Designed and maintained **PostgreSQL** database for comprehensive student records, implementing data migration scripts that preserved historical data while ensuring data integrity.
- Integrated third-party payment processing using **Stripe API**, securely handling healthcare course transactions and reducing payment failures through proper error handling.
- Built interactive **React** learning modules with assessment functionality, implementing gamification elements that improved student completion rates.

Software Engineer I | Ultimate Medical Academy | 08/2018 - 04/2019

- Developed and maintained **Python** automation scripts for course content processing, saving **15 hours per week** of manual work and improving content deployment speed.
- Assisted in building **Django** admin interfaces for course management system, creating custom views and forms that improved operational efficiency for content administrators.
- Supported **AWS** infrastructure and performed automated database backups, ensuring data integrity and disaster recovery readiness.

SDK Intern | Accusoft | 06/2017 - 08/2018

- Developed **C#** SDK documentation and sample applications, helping third-party developers integrate imaging SDKs and reducing support ticket volume through comprehensive examples.
- Fixed bugs and wrote unit tests for **.NET** components, improving SDK stability and reliability while participating in code reviews.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
