Summary

Senior Software Engineer with **8 years** of experience designing and shipping production systems across B2B marketplaces, healthcare education, and developer tooling. Built and scaled the **Nexpart** B2B automotive marketplace platform serving millions of daily requests, led development of **Tackle.io**'s multi-tenant SaaS integration platform processing billions of API calls, and delivered **Ultimate Medical Academy**'s student information system supporting 50,000+ learners. Expert in **Python, Django, FastAPI, PostgreSQL**, and **AWS**. Collaborated with 5+ cross-functional teams including product, data engineering, and customer success. Seeking to apply deep backend architecture and **AI/ML** expertise to high-scale ecommerce infrastructure.

Core Skills

Languages and Frameworks: HTML, CSS

Backend Development: Python, Django, FastAPI, Flask, RESTful APIs, GraphQL, WebSocket

Database & Storage: PostgreSQL, Redis, MongoDB, Elasticsearch, SQL optimization, Data modeling

Cloud & Infrastructure: AWS, Docker, Kubernetes, CI/CD pipelines, Terraform, Linux

Frontend & Integration: React, JavaScript, TypeScript, OAuth2, Webhook integrations, Third-party APIs

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Architected and deployed microservices for Tackle.io's multi-tenant **Go-To-Market Cloud** platform, handling 2B+ daily API requests across 500+ enterprise customers using **Python, FastAPI**, and **Kubernetes**.
- Designed scalable **webhook delivery system** with at-least-once guarantees and configurable retry logic, improving event reliability from 94% to 99.7% for **Salesforce** and **HubSpot** integrations.
- Led migration of legacy **monolith architecture** to event-driven microservices using **AWS SQS** and **SNS**, reducing deployment cycle from 2 weeks to 2 days and enabling horizontal scaling during peak loads.
- Built and maintained **OAuth2** and **SAML-based authentication** flows for 15+ marketplace integrations, securing 100K+ API keys and reducing authentication failures by 60%.
- Collaborated with 5+ cross-functional teams to deliver **30+ enterprise integrations** with CRM and ERP platforms, reducing manual data entry by 75% for SaaS vendors.
- Mentored 4 junior engineers through **code reviews** and pair programming sessions, improving team velocity by 20% and reducing production incidents by 40%.
- Implemented comprehensive **observability stack** with Datadog and distributed tracing, cutting mean time to detection from 15 minutes to under 2 minutes across critical services.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Developed **RESTful APIs** and **GraphQL endpoints** for marketplace listing management using **Python** and **Django**, enabling real-time inventory synchronization for 200+ ISV partners.
- Built **integration testing framework** with **pytest** and **Docker Compose**, increasing test coverage from 45% to 85% and catching 20+ regressions before production deployment.
- Designed **data pipeline** processing 5M+ records daily from third-party sources, implementing **PostgreSQL** partitioning and **Redis caching** layers that reduced query latency from 1.2s to 180ms.
- Created internal CLI tooling in **Python** for automated deployment and configuration management, saving 10+ hours weekly for the engineering team and eliminating human error in routine operations.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Designed and implemented **RESTful APIs** for healthcare education platform serving 50,000+ students using **Python**, **Django**, and **PostgreSQL**, supporting HIPAA-compliant data handling workflows.
- Integrated with 15+ third-party systems including LMS platforms, **payment gateways**, and assessment tools, streamlining enrollment processes and reducing administrative overhead by 30%.
- Optimized **database queries** and implemented **Redis caching** strategies, cutting API response times from 800ms to under 150ms and improving platform reliability during enrollment peaks.
- Developed automated reporting system generating compliance documents for accreditation bodies, replacing 20+ hours of monthly manual work with near-instant generation and audit trails.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Built student management features and course enrollment workflows using **React** and **Python**, improving course completion rates by 15% through simplified user experiences.
- Implemented **automated email campaigns** and notifications using **Twilio** and **SendGrid**, increasing student engagement metrics by 25% and reducing dropout rates.
- Analyzed student performance data to identify at-risk learners, enabling proactive interventions that improved retention by 10% across targeted cohorts.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Built automated testing frameworks achieving 95% code coverage and created developer documentation for SDK endpoints, reducing support tickets by 30% during launch quarter.
- Developed **OCR SDK** integration components in **Python** and **C#**, providing document processing capabilities for 2000+ external developers through comprehensive API libraries.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
