Summary

Senior Software Engineer with **8 years** of experience building and maintaining production software systems across healthcare, SaaS, and developer tools domains. Delivered end-to-end backend services handling **Python, Node.js, RESTful APIs, and SQL/NoSQL databases** for organizations including Ultimate Medical Academy and Tackle.io. Architected cloud-native solutions using **AWS, TypeScript, and Docker** with measurable reductions in system latency. Seeking to apply deep backend engineering expertise to scalable health technology platforms. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages & Frameworks: Python, Node.js, TypeScript, JavaScript, React, Django, Express.js, HTML, CSS

Backend & APIs: RESTful APIs, GraphQL, PostgreSQL, MySQL, MongoDB, Redis, ORM frameworks

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD pipelines, Terraform, cloud infrastructure management

Tools & Practices: Git, Jira, Agile/Scrum, unit testing, code reviews, microservices architecture

Work Experience

Senior Software Engineer | Tackle.io | Remote | 03/2022 - Present

- Designed and deployed scalable backend microservices using **Python** and **Node.js**, supporting cloud marketplace integrations for enterprise customers across 3 major cloud providers.
- Built **RESTful APIs** with authentication and rate limiting, processing over 10,000 requests per day while maintaining 99.9% uptime for SaaS platform operations.
- Led migration of legacy Express.js services to containerized **Kubernetes** clusters on **AWS**, improving resource utilization by 40% and reducing infrastructure costs.
- Optimized database queries in **PostgreSQL** and **MongoDB**, reducing average response times from 3s to under 1s for critical reporting endpoints.
- Implemented **CI/CD pipelines** using GitHub Actions and **Docker** containers, decreasing deployment frequency from weekly to daily releases with zero downtime rollouts.
- Collaborated with product and design teams across 5+ squads to define API specifications and ensure backward compatibility for external partner integrations.
- Mentored 3 junior engineers on backend best practices, conducting code reviews and establishing testing standards that increased code coverage to 85%.

Software Engineer | Tackle.io | Remote | 06/2021 - 03/2022

- Created automated testing suites for API endpoints using Jest and Supertest, identifying critical bugs before production deployment and reducing customer-reported issues by 30%.
- Participated in on-call rotation, resolving production incidents with median response time under 15 minutes and maintaining service reliability targets.
- Refactored core authentication service to support multi-tenant **OAuth 2.0** flows, expanding platform accessibility for 50+ enterprise clients.
- Developed **TypeScript** integration modules enabling smooth data synchronization between customer CRM systems and Tackle's marketplace platform.

Software Engineer II | Ultimate Medical Academy | Remote | 04/2019 - 06/2021

- Architected healthcare compliance features using **Django** and **PostgreSQL** for a learning management system serving 15,000+ active students in medical education programs.
- Developed **RESTful APIs** powering mobile and web applications, supporting real-time progress tracking and video content delivery for distance learning.
- Integrated third-party telemedicine APIs into the platform ecosystem, enabling virtual classroom functionality that expanded program accessibility to rural communities.
- Built HIPAA-compliant data pipelines processing sensitive student records, implementing encryption at rest and audit logging for regulatory adherence.

Software Engineer I | Ultimate Medical Academy | Remote | 08/2018 - 04/2019

- Implemented student assessment modules using **Python** and **React**, streamlining exam delivery and grading workflows for 8 certification programs.
- Resolved software defects and gathered user feedback, directly contributing to a 4.2-star mobile app rating improvement over two quarters.
- Maintained legacy PHP codebase while progressively migrating features to modern **JavaScript** stack, improving page load performance by 25%.

SDK Intern | Accusoft | Remote | 06/2017 - 08/2018

- Authored technical documentation and code samples in **TypeScript** and JavaScript, decreasing support ticket volume by 20% for common integration questions.
- Developed **Node.js** SDK wrappers for document imaging APIs, reducing integration time for enterprise customers from days to hours.

Education

Bachelor of Science

University of South Florida

08/2014 - 05/2018
