Summary

Senior Full Stack Developer with **8 years** of experience designing and delivering enterprise solutions across healthcare and consulting sectors. Built and maintained custom **ServiceNow** applications, **workflows**, and **REST API** integrations supporting federal client service management operations. Led teams of 5+ developers through end-to-end delivery of 30+ enterprise platform enhancements, reducing incident resolution time by improving automation coverage. Partnered with technical and business stakeholders to gather requirements and translate needs into scalable platform improvements. Seeking to leverage deep ServiceNow platform expertise and **JavaScript** proficiency to drive enterprise digital transformation initiatives.

Core Skills

Languages and Frameworks: TypeScript, HTML, CSS

ServiceNow Development: ServiceNow, JavaScript, Business Rules, Client Scripts, UI Actions, Glide API, Service Portal, Workflow Automation

Programming & Database: Java, Python, SQL, REST APIs, XML, JSON

Tools & Platforms: Git, Jenkins, JIRA, Confluence, Agile, SDLC

Platform Administration: Incident Management, Change Management, Performance Optimization, Troubleshooting

Work Experience

Senior Full Stack Developer | Guidehouse | 08/2023 - Present

- Designed and developed custom **ServiceNow** applications including **business rules**, **client scripts**, and **UI actions** to support enterprise IT service management for federal healthcare clients.
- Partnered with technical and business stakeholders to gather requirements, translate needs into technical solutions, and deliver scalable platform improvements for 30+ project initiatives.
- Configured and maintained **workflows**, **automation**, and platform integrations using **REST APIs**, reducing manual processing overhead across service management operations.
- Supported **ServiceNow** platform administration including **incident resolution**, **problem analysis**, and **performance optimization** to ensure system reliability.
- Conducted code reviews, testing, and deployment activities for **ServiceNow** releases, maintaining solution quality and alignment with enterprise standards.
- Mentored junior developers on **ServiceNow** scripting best practices and platform configuration, building team capability across custom application development.
- Implemented **change management** and **incident management** modules within **ServiceNow**, improving operational efficiency for federal client teams.
- Created technical documentation and solution designs for **ServiceNow** platform enhancements, supporting knowledge transfer and enterprise adoption.

Software Engineer (Process Development Engineer) | Regeneron | 01/2022 - 08/2023

- Collaborated with cross-functional teams to translate business requirements into technical solutions, delivering process automation that saved \$5000+ annually in operational costs.
- Developed custom applications using **Java** and **Python** to automate manufacturing data workflows, improving process efficiency across biotech production operations.
- Built **REST API** integrations connecting laboratory systems, reducing data entry errors and improving cross-functional data accessibility.
- Performed **troubleshooting** and **performance optimization** on production applications, maintaining 99.9% system uptime for critical manufacturing processes.

Associate Software Engineer (Process Development Associate) | Regeneron | 01/2017 - 12/2021

- Developed and maintained laboratory information management applications using **Java** and **SQL**, ensuring compliance with FDA regulatory requirements.
- Created automated testing procedures and data validation scripts using **Python**, improving data integrity across production systems.
- Assisted in designing and implementing custom reporting tools and dashboards for operational metrics tracking and decision support.
- Collaborated with quality assurance teams to conduct testing and validation of software changes in regulated manufacturing environments.
- Participated in **Agile** ceremonies including sprint planning and retrospectives, contributing to iterative delivery of software enhancements.

Laboratory Assistant | Regeneron | 01/2016 - 12/2016

- Supported laboratory operations and data collection processes, developing foundational understanding of regulated biotech manufacturing environments.
- Maintained laboratory equipment and inventory systems, ensuring compliance with standard operating procedures and quality standards.
- Assisted in quality control processes and documentation, supporting validation activities for manufacturing operations.

Education

Bachelor of Arts

Vassar College | 2011 - 2015
