Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018

Core Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks & Libraries: SpringBoot, React, Node.js, Express, JUnit

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, Terraform

Databases & Messaging: PostgreSQL, MySQL, Redis, RabbitMQ, ElasticSearch

Work Experience

FrontDoor, Senior Full Stack Engineer (09/2022 - Present)

- Designed and built a micro-service architecture for the mortgage-origination workflow using **Java**, **SpringBoot**, and **PostgreSQL**, cutting processing time from 3 seconds to 1.2 seconds.
- Implemented a real-time notification hub with **WebSocket** and **Redis**, enabling instant updates for over 1.2k concurrent users.
- Created a reusable UI component library in **React** and **TypeScript**, reducing front-end development effort by 25% across teams.
- Automated CI/CD pipelines with **GitHub Actions** and **Docker**, achieving daily deployments without service interruption.
- Led on-call rotation for critical services, diagnosing kernel-level performance issues and restoring SLA compliance within minutes.
- Collaborated with product, security, and data teams to embed OAuth2 and audit logging, strengthening compliance for regulated financial data.

ZenBusiness, Full Stack Developer (01/2021 - 11/2022)

- Built a tax-filing portal using **Node.js**, **Express**, and **React**, serving 150k+ filings annually.
- Refactored legacy payment APIs to **RESTful** services with **Java** and **Spring**, decreasing error rates by 18%.
- Integrated **AWS S3** and **CloudFront** for document storage, cutting retrieval latency by 30%.
- Mentored junior engineers on test-driven development, raising unit-test coverage from 45% to 78%.
- Participated in on-call support, resolving production incidents within an average of 12 minutes.

Northstar Software Development, Full Stack Engineer (11/2020 - 06/2021)

- Developed core recruiting features for the ATS platform using **Ruby on Rails** and **PostgreSQL**, increasing candidate match accuracy by 22%.
- Created responsive dashboards in **React** that reduced recruiter onboarding time from 2 days to 4 hours.
- Implemented background job processing with **Sidekiq**, improving email delivery reliability to 99.9%.
- Optimized database indexes, cutting query response times by 35% during peak hiring cycles.
- Provided on-call support for the SaaS environment, handling incidents with kernel-level debugging tools.

Arbisoft, Software Engineer (10/2018 - 08/2020)

- Delivered the FixAlert incident-response system using **Java**, **Spring MVC**, and **MySQL**, supporting 5 major clients.
- Engineered REST APIs for alert ingestion, achieving a 99.5% success rate under high-load conditions.
- Introduced automated testing with **JUnit** and **Selenium**, reducing regression defects by 40%.
- Containerized services with **Docker**, enabling rapid environment replication for QA.
- Participated in on-call rotation, resolving critical alerts within SLA windows.
