Summary

Senior Full Stack Engineer with **8 years** of experience building scalable web applications for property valuation, business services, and enterprise monitoring domains. Built and owned end-to-end platforms including property valuation and loan origination for real estate, business formation and compliance for small businesses, applicant tracking for recruitment, and alerting systems for enterprise monitoring. Key technologies include **React**, **Node.js**, **TypeScript**, **PostgreSQL**, and **AWS**. Reduced API latency from 3s to under 1s by implementing Redis caching and database indexing optimizations. Collaborated with cross-functional teams across multiple organizations. Seeking to bring full-stack expertise to AI-driven insurance claims products at EvolutionIQ.

Core Skills

Languages & Frameworks: JavaScript, TypeScript, React, Angular, Node.js, Express, HTML, CSS, Python

Databases&Caching: PostgreSQL, MongoDB, Redis, SQL

Cloud&DevOps: AWS, GCP, Docker, GitHubActions, CI/CD

Testing&Tools: Jest, Cypress, Git, RESTAPIs, GraphQL

Experience

SeniorFullStackEngineer|FrontDoor|Remote,US|09/2022 - Present

- Builtpropertyvaluationandloanoriginationplatformsservingtherealestatemarket, owningfrontendcomponentsandbackendservicesend-to-end.
- Designedcreditevaluationworkflowsformortgageapprovaldecisions,implementingoptimizeddatabasequeriesandtransactionmanagementwithPostgreSQLandRedis.
- ReducedAPIresponsetimesby40%throughRediscachinganddatabaseindexingoptimizationsforrealstatefinancialcalculations.
- Designedandimplementedmulti-stepapprovalworkflowsusingPostgreSQLtransactionmanagement,increasingprocessingthroughputby35%.
- BuiltcomprehensivereportingandanalyticsdashboardswithReactcomponentsanddataaggregation, achievingsub-2sloadtimethroughRediscaching.
- DevelopedandsecuredRESTfulAPIswithOAuth2, integratingthird-partyfinancialdataprovidersandimplementingratelimitingtopreventabuse.
- MigratedmonolithicarchitecturetomicroservicesusingDockercontainers,improvingdeploymentflexibilityandsystemresilienceforproductionenvironments.
- EstablishedCI/CDpipelineswithautomatedtestinganddeploymentworkflows,decreasingreleasecyclesfromweeklytodailythroughGitHubActions.

FullStackDeveloper|ZenBusiness|Remote,US|01/2021 - 11/2022

- BuiltandshippedcoreSaaSfeaturesincludingentityformation,registeredagentservices,andcomplianceadlinetrackingfor500K+smallbusinesscustomers.
- Architectedmulti-tenantSaaSplatformwithPostgreSQLisolateddataschemaspercustomer,reducinginfrastructurecostsby\$5Kmonthly.
- DesignedRESTfulAPIswithExpress.js to handle high-volume business filings and payment processing, supporting 10K+ transactions daily.
- Implemented automated compliance workflow engine for state filings and document generation, cutting manual processing time from 5 days to 1 day.
- Built internal admin portal using React and Redux for customer support teams to manage accounts and resolve customer issues efficiently.

- Integrated third-party services including Stripe payments, Twilio SMS notifications, and domain registrar APIs for end-to-end business formation.

Full Stack Engineer | Northstar Software Development | TX, US | 11/2020 - 06/2021

- Built applicant tracking system from the ground up for SMB recruitment management, handling job postings, resume parsing, and candidate pipeline tracking with 500+ active users.
- Developed and shipped 10+ product features as sole engineer in fast-paced startup environment, meeting aggressive deadlines for recruitment platform releases.
- Optimized PostgreSQL queries reducing complex report generation times from 40s to under 5s, significantly improving hiring team productivity.
- Built REST API endpoints processing 5K+ requests per day for major job board integrations including Indeed and LinkedIn.
- Designed data models and migration scripts for smooth transition of legacy ATS data into new platform architecture.

Software Engineer | Arbisoft | Remote, US | 10/2018 - 08/2020

- Developed FixAlert SaaS platform using Angular and Node.js serving 50+ enterprise clients with complex monitoring and notification requirements.
- Implemented real-time notification engine processing 100K+ alerts daily using event-driven architecture with Node.js and Redis pub/sub.
- Designed and implemented multi-channel notification delivery across email, SMS, Slack, and webhook channels for enterprise alerting scenarios.
- Collaborated with product team to define requirements and deliver features on schedule for FixAlert enterprise monitoring product.
- Automated testing with Jest and Cypress achieving 80% code coverage across backend services and frontend components.
- Built CI/CD pipelines using GitHub Actions reducing deployment time by 50% through automated build, test, and release workflows.

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018
