Summary

Senior Full Stack Engineer with **8 years** of experience designing and delivering scalable web applications across SaaS, real estate, and enterprise platforms. Demonstrated ability to architect **RESTful APIs**, implement **CI/CD pipelines**, and optimize **PostgreSQL** query performance. Led cross-functional teams of 5+ members through full product lifecycles, delivering 40+ projects on time. Currently Works on building secure, cloud-native solutions using **AWS**, **Docker**, and **TypeScript**. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages: Python, TypeScript, JavaScript, SQL, Bash, HTML, CSS

Frameworks: React, Node.js, Express, Django, Next.js

Infrastructure: AWS, Docker, Kubernetes, Terraform, Linux

Databases: PostgreSQL, MySQL, Redis, MongoDB, DynamoDB

DevOps: CI/CD, Jenkins, GitHub Actions, Monitoring, CloudFormation

Work Experience

Senior Full Stack Engineer | Frontdoor | Remote | 09/2022 - Present

- Led team of 4 engineers through full product lifecycle from requirements to production launch, delivering features used by 50,000+ monthly active users.
- Architected and developed real estate financial platform using **React** and **Node.js**, enabling property management workflows for thousands of users.
- Designed **PostgreSQL** schemas with advanced indexing strategies, cutting query response times from 3s to under 1s for dashboard analytics.
- Established **CI/CD pipelines** with automated testing and staging deployments, reducing manual deployment effort by 15 hours weekly.
- Containerized microservices using **Docker** and ran deployments on **AWS ECS**, improving release frequency by 40%.
- Built and secured **RESTful APIs** with **OAuth2** and **JWT** authentication, reducing unauthorized access incidents.

Full Stack Developer | ZenBusiness | Remote | 01/2021 - 11/2022

- Optimized **Django** ORM queries and implemented caching layer with **Redis**, decreasing page load times by 60%.
- Developed SaaS business formation platform serving 500,000+ entrepreneurs, building **React** dashboards and **Python** backend services.
- Built microservices architecture for document generation and filing workflows using **Docker** and **AWS Lambda**.
- Mentored 3 junior developers on code review standards, testing practices, and **TypeScript** migration strategies.
- Collaborated with product managers to translate business requirements into technical specifications and sprint deliverables.

Full Stack Engineer | Northstar Software Development | TX | 11/2020 - 06/2021

- Built applicant tracking system (ATS) features using **React** and **Node.js**, improving hiring workflows for enterprise clients.
- Developed **RESTful API** endpoints with input validation and error handling, ensuring 99.9% uptime during high-traffic periods.

- Created automated test suites with **Jest**, increasing code coverage from 45% to 80%.
- Implemented file upload and processing pipelines with **AWS S3** and serverless functions.
- Participated in on-call rotation, triaging and resolving production issues within SLA targets.

Software Engineer | Arbisoft | Remote | 10/2018 - 08/2020

- Developed FixAlert notification system features using **Python** and **Django**, serving 10,000+ active users.
- Built responsive web interfaces with **JavaScript** and frontend frameworks, enhancing user engagement metrics.
- Designed database models and wrote optimized **SQL** queries for reporting and analytics modules.
- Collaborated with remote team members across multiple time zones using Agile methodologies.
- Resolved critical bugs and performed code reviews to maintain codebase quality standards.

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018
