Summary

Senior Full Stack Engineer with **8 years** of end-to-end product ownership, having architected a high-throughput real-estate financing platform, a multi-tenant business onboarding suite, and an AI-enhanced applicant tracking service. Expert in **Node.js**, **React**, **Next.js**, **Python** and **Docker**. Delivered a 35 % reduction in transaction latency while partnering with product, data science and security teams. Currently Works on scaling AI-driven user experiences across cloud-native environments. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Languages and Frameworks: JavaScript

Backend Development: Node.js, Express, TypeScript, Python, PostgreSQL, REST

Frontend Development: React, Next.js, Redux, GraphQL, HTML5, CSS3

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Terraform

Security & Integration: OAuth2, JWT, API Gateway, WebSockets, Unit Testing, Jest

Work Experience

FrontDoor, Senior Full Stack Engineer (09/2022 - Present)

- Led redesign of the loan-origination API using **Node.js** and **TypeScript**, consolidating three legacy services and cutting average response time from 1.8 s to 0.9 s while handling a daily volume of 12,000 requests.
- Established CI/CD pipelines in **GitHub Actions**, decreasing deployment lead time from 45 minutes to 7 minutes and enabling on-call rollbacks within seconds.
- Integrated an LLM-driven document summarizer using **Python**, reducing manual review time from 5 minutes to under 30 seconds per file.
- Implemented a **React/Next.js** dashboard for underwriting teams, introducing real-time risk visualizations that increased processing throughput by 22 %.
- Containerized all microservices with **Docker** and ran on **AWS ECS**, achieving 99.95 % uptime over a six-month period.

ZenBusiness, Full Stack Developer (01/2021 - 11/2022)

- Optimized payment processing workflow by adding async job queues, lowering transaction failures from 3 % to 0.7 %.
- Authored RESTful APIs secured with **OAuth2**, handling over 2 million API calls monthly with zero security incidents.
- Built a multi-tenant onboarding platform with **Node.js** and **PostgreSQL**, supporting 8,000 new business registrations per month.
- Created reusable UI components in **React** and **Redux**, cutting front-end code duplication by 40 %.
- Mentored a squad of 4 engineers, improving sprint velocity by 15 % through code-review standards.

Northstar Software Development, Full Stack Engineer (11/2020 - 06/2021)

- Designed a **React** UI with **Next.js** for recruiter dashboards, reducing page load time from 3.2 s to 1.4 s.
- Implemented automated test suites with **Jest** and **Supertest**, raising code coverage to 92 %.
- Developed applicant-tracking microservices in **Node.js**, enabling real-time resume parsing for 150 enterprise clients.
- simplified CI pipeline using **GitLab CI**, cutting build times by 30 %.
- Integrated third-party AI screening APIs, improving candidate match accuracy by 18 %.

Arbisoft, Software Engineer (10/2018 - 08/2020)

- Set up Docker containers for development environments, reducing onboarding time for new hires from 2 weeks to 3 days.
- Collaborated with QA and product teams to resolve critical bugs, achieving a 99.8 % issue-resolution rate within SLA.
- Contributed to the FixAlert product, building backend endpoints in **Node.js** that processed over 500,000 alerts monthly.
- Implemented front-end features with **React**, enhancing user engagement metrics by 12 %.
- Migrated legacy database to **PostgreSQL**, improving query performance by 25 %.

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018
