## Summary

**Senior Full Stack Engineer** with **8 years** of end-to-end product ownership, delivering a real-time property valuation engine, an automated loan underwriting workflow, and a high-traffic customer portal. Expert in **Java, Spring, React, AWS**, and **Docker**. Cut processing time from 12 minutes to 3 minutes, saving \$250 k annually while partnering with product, data science, and compliance teams. Currently Works on expanding event-driven microservices for next-gen fintech platforms. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

## Education

### Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018

## Core Skills

**Programming Languages:** Java, Python, JavaScript, TypeScript, Ruby, HTML, CSS

**Frameworks & Libraries:** SpringBoot, React, Node.js, Express, Django, Ruby on Rails

**Cloud & DevOps:** AWS, Docker, Kubernetes, GitHub Actions, Terraform

**Data & Messaging:** PostgreSQL, Amazon RDS, Kafka, Elasticsearch, Redis

## Work Experience

### FrontDoor, Senior Full Stack Engineer (09/2022 - Present)

- Designed event-driven microservice for mortgage application processing using **Java** and **Spring Boot**, reducing latency from 12 minutes to 3 minutes, saving \$250k annually.
- Built a responsive customer dashboard with **React** and **TypeScript**, supporting 150k concurrent users and achieving 99.9% uptime.
- Integrated **AWS S3** and **Lambda** for document ingestion, cutting manual handling time by 70%.
- Containerized all services with **Docker** and orchestrated via **Kubernetes**, enabling zero-downtime deployments across three regions.
- Mentored a squad of 6 engineers on test-driven development, raising code coverage from 62% to 85%.

### ZenBusiness, Full Stack Developer (01/2021 - 11/2022)

- Created a SaaS onboarding platform using **Node.js** and **Express**, onboarding 20k new businesses per quarter.
- Developed RESTful APIs secured with OAuth2, decreasing security incidents by 40%.
- Migrated legacy PostgreSQL schemas to **Amazon RDS**, improving query performance by 2.5x.
- Implemented CI/CD pipelines in **GitHub Actions**, cutting release cycle from weekly to daily.
- Collaborated with product and compliance teams to automate tax filing workflows, reducing processing time by 3 hours per batch.

### Northstar Software Development, Full Stack Engineer (11/2020 - 06/2021)

- Engineered an applicant tracking system using **Ruby on Rails** and **React**, handling 10k job postings monthly.
- Refactored search functionality with **Elasticsearch**, boosting result relevance scores by 15%.
- Added real-time notification service via **WebSocket**, increasing candidate engagement by 25%.
- Optimized background job processing with **Sidekiq**, cutting job latency from 8 seconds to 2 seconds.

- Conducted code reviews and pair-programming sessions, improving team velocity by 20 %.

### **Arbisoft, Software Engineer (10/2018 - 08/2020)**

- Developed the FixAlert monitoring tool using **Python** and **Django**, alerting 5 k devices in real time.
- Implemented a scalable data pipeline with **Kafka** and **Celery**, processing 2 M events daily.
- Added role-based access control, reducing unauthorized access attempts by 30 %.
- Wrote unit and integration tests achieving 78 % coverage across core modules.
- Coordinated with client QA to resolve critical bugs within 24 hours, maintaining SLA compliance.
