Summary

Senior Full Stack Engineer with **8 years** of experience building enterprise SaaS platforms and real estate financial systems. Led development of **FixAlert** monitoring platform at Arbisoft and served as primary on-call engineer maintaining 99.9% uptime for production systems. At ZenBusiness, contributed to compliance workflows serving **100K+ businesses**. Currently owning FrontDoor financial platform end-to-end, integrating **React**, **Node.js**, **PostgreSQL**, and **AWS**. Seeking to drive scalable platform development at a growth-stage company. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Frontend: React, TypeScript, JavaScript, GraphQL, HTML5, CSS3

Backend: Node.js, Python, Express, REST APIs, PostgreSQL, Redis

Cloud&DevOps: AWS, Docker, CI/CD, GitHub Actions, ElasticBeanstalk, CloudWatch

Security&Monitoring: OAuth2, JWT, Datadog, SNS, SQS, Elasticsearch

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018

Work Experience

FrontDoor, SeniorFullStackEngineer

09/2022 - Present | Remote

- Built property listing and search infrastructure using **React**, **Elasticsearch**, and **Node.js**, enabling real-time filtering across 50K+ active listings with sub-second query responses.
- Developed mortgage calculators and transaction management workflows processing **\$2M+** in monthly closing costs, integrating **Stripe** and title company APIs.
- Implemented end-to-end encryption and **role-based access control** for sensitive financial documents, achieving SOC 2 compliance readiness.
- Designed **PostgreSQL** schemas for complex real estate transactions supporting multi-party escrow workflows with atomicity guarantees.
- Led migration of monolith to **microservices architecture** on **AWS ECS**, reducing deployment cycle from 4 hours to 15 minutes.
- Served as primary on-call engineer responding to production incidents; maintained **99.95% uptime** across 18-month period.
- Mentored 3 junior developers through code review processes and weekly technical sessions, promoting team skill growth.
- Integrated MLS data feeds using **Python** ETL pipelines, normalizing property data from 12 different vendor formats.

ZenBusiness, Full Stack Developer

01/2021 - 11/2022 | Remote

- Developed compliance and business formation workflows supporting **100K+** registered businesses, processing state filings across all 50 jurisdictions.

- Built **React** admin dashboards for internal operations team, reducing manual task completion time by 40% through workflow automation.
- Created **GraphQL** API layer aggregating data from 8 microservices, eliminating redundant database calls and improving frontend load times by 35%.
- Implemented document generation service using **Python** and **Node.js**, handling **5,000+** legal documents monthly with automated state-specific formatting.
- Integrated third-party services including **IRS EIN API**, state Secretary of State portals, and payment processors through custom **REST API** handlers.
- Reduced database query times by implementing **Redis** caching layer for frequently accessed compliance rule sets, achieving 60% cache hit rate.

Northstar Software Development, Full Stack Engineer

11/2020 - 06/2021 | TX, US

- Developed **ATS (Applicant Tracking System)** SaaS platform from inception, building **React** frontend and **Node.js** backend with **PostgreSQL** database.
- Created **RESTful APIs** with **JWT** and **OAuth2** authentication, securing sensitive candidate data with encryption at rest.
- Built kanban-style candidate pipeline interface with drag-and-drop functionality, used by 20+ recruiting agencies.
- Implemented automated email sequencing system with **Python**, reducing manual outreach by 8 hours weekly per recruiter.
- Designed reporting dashboard with **PostgreSQL** aggregation queries providing real-time hiring metrics and conversion analytics.

Arbisoft, Software Engineer

10/2018 - 08/2020 | Remote

- Built **FixAlert** monitoring platform serving 200+ enterprise clients, developing **Node.js** alert aggregation engine processing 1M+ events daily.
- Implemented real-time notification delivery using **AWS SNS** and **SQS**, achieving 99.9% message delivery success rate.
- Developed React monitoring dashboards with WebSocket integration for live incident visualization and team collaboration features.
- Deployed containerized applications on **AWS ECS** with **CI/CD pipelines** via **GitHub Actions**, reducing release cycle time by 50%.
- Optimized **PostgreSQL** query performance through indexing and query restructuring, improving dashboard load times from 8 seconds to 1.5 seconds.
- Served as primary on-call engineer for production incidents; maintained **99.9% uptime** across 2-year period through proactive monitoring.
