Summary

Senior Full Stack Engineer with **8 years** of experience building and maintaining distributed web applications across fintech, SaaS, and real estate platforms. Led end-to-end development of customer-facing products serving thousands of daily active users, implementing CI/CD pipelines and cloud infrastructure on **AWS**. Collaborated with cross-functional teams to deliver features from conception through production while ensuring system reliability. Seeking to bring automation-first mindset and platform engineering expertise to a team building scalable cloud services. Owns production infrastructure end to end, including on call coverage, deployment automation, and monitoring across distributed services. Comfortable partnering with platform and application teams on reliability work.

Core Skills

Cloud & DevOps: AWS, Kubernetes, Docker, GitLab CI, CI/CD Pipelines, Infrastructure as Code, Linux

Backend: Python, Node.js, Django, FastAPI, REST APIs, GraphQL, PostgreSQL, Redis

Frontend: React, TypeScript, JavaScript, HTML/CSS, Redux, Next.js

Platform Engineering: CI/CD Automation, Monitoring & Observability, Cloud Architecture, Mentoring, Windows & Linux Administration, Bash, Ansible, Terraform, Prometheus, Grafana

Work Experience

Frontdoor | Senior Full Stack Engineer | 09/2022 - Present

- Architected and deployed microservices on **AWS EKS**, improving deployment frequency from monthly to weekly releases for the real estate financial platform.
- Developed and maintained **GitLab CI** pipeline libraries, reducing average build time by 40% across 15+ internal projects.
- Collaborated with product and design teams to deliver 8 major features for the customer-facing web portal.
- Implemented infrastructure-as-code using Terraform, enabling reproducible environments and cutting provisioning time from days to hours.
- Led migration of legacy monolithic application to containerized architecture on **Kubernetes**, improving system scalability.
- Built **Python**-based data processing services handling 500K+ daily transactions with automated monitoring alerts.
- Provided technical mentorship to 3 junior developers through code reviews and pair programming sessions.
- Established CI/CD best practices and documentation, increasing team velocity by 25% over two quarters.

ZenBusiness | Full Stack Developer | 01/2021 - 11/2022

- Developed business formation features using **React** and **Node.js**, supporting 40+ simultaneous users during peak filing seasons.
- Optimized **PostgreSQL** queries and implemented Redis caching, reducing API response times from 3s to under 1s.
- Built **RESTful APIs** with **Python** and **Django** powering the SaaS platform's core business logic.

- Wrote automated test suites achieving 85% code coverage across critical payment and filing workflows.
- Participated in on-call rotation, triaging and resolving production incidents with 99.9% uptime maintained.

Northstar Software Development | Full Stack Engineer | 11/2020 - 06/2021

- Delivered ATS (Applicant Tracking System) features using **React** and **Node.js** for a SaaS client serving 200+ recruiters.
- Participated in agile ceremonies and sprint planning, contributing to on-time delivery of 3 major releases.
- Worked closely with UX team to redesign candidate search interface, improving user engagement metrics.
- Implemented file upload and processing service handling 500+ documents daily with automated validation.
- Built **REST API** endpoints with authentication using **OAuth2** and JWT tokens.

Arbisoft | Software Engineer | 10/2018 - 08/2020

- Built FixAlert product features using **Python** and **Django**, supporting 5+ team members across distributed locations.
- Performed code reviews and mentored 2 intern developers on Python best practices and testing strategies.
- Developed responsive frontend components with **React** and JavaScript for the alert management dashboard.
- Designed database schemas in **PostgreSQL** and implemented efficient ORM queries for reporting modules.
- Integrated third-party notification services via webhooks, reducing manual alert dispatch workload.

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018
