Work Experience

Senior Full Stack Engineer | FrontDoor | Remote, US | 09/2022 - Present

- Architected a real estate financial platform on **React**, **Next.js**, and **Node.js** that onboarded 40+ lender partners and cut page load from 3s to 1s through SSR and edge caching.
- Built cloud native microservices on **AWS** with **Docker**, **Kubernetes**, and **Terraform**, improving release cadence from biweekly to daily and removing manual deploy steps for a 6 engineer squad.
- Led migration of a legacy monolith to **NestJS** and **TypeScript**, retiring 4 services and shrinking infrastructure cost by \$50,000 per year.
- Introduced **Jest**, **Playwright**, and contract testing in **GitHub Actions**, raising coverage from 42% to 86% and catching 3 critical regressions before release.

Full Stack Developer | ZenBusiness | Remote, US | 01/2021 - 11/2022

- Built a payments microservice on **Python** and **FastAPI** integrated with Stripe and Plaid, processing \$4M in annual revenue without a chargeback spike.
- Delivered LLC formation and compliance flows on **React**, **Next.js**, and **Node.js** that served 200,000+ small business customers.
- Wired **GitHub Actions** pipelines with **Docker** images and **Terraform** deploys, reducing release time from 25 minutes to 6 minutes.
- Coached 2 junior engineers on testing with **Jest** and **Cypress**, lifting coverage on the formation journey to 80%.
- Migrated analytics workloads to **PostgreSQL** and **Redis**, shrinking nightly report jobs from 45 minutes to 12 minutes.

ATS-check SaaS Full Stack Engineer | Northstar Software Development | TX, US | 11/2020 - 06/2021

- Implemented a rules engine in **Node.js** and **PostgreSQL** that matched candidates to job descriptions and ranked scores in under 800ms.
- Shipped an ATS resume scanning product on **React** and **NestJS**, parsing 12+ resume formats with 94% field accuracy.
- Containerized services with **Docker** and deployed to **AWS** ECS, cutting environment setup time from 1 day to 1 hour.
- Built CI pipelines in **GitHub Actions** running **Jest** and **Cypress** suites, blocking 9 broken builds per week.
- Partnered with HR product owners on keyword scoring and bias controls, improving customer match satisfaction by 22%.

Software Engineer | Arbisoft | Remote, US | 10/2018 - 08/2020

- Built FixAlert, a multi tenant **React** and **Node.js** SaaS for property maintenance alerts used by 30+ enterprise clients.
- Set up **GitHub Actions** with **Docker** builds and AWS deploys, freeing engineers to ship 4+ releases per week.
- Owned the on call rotation and authored runbooks that reduced incident resolution from 2 hours to 35 minutes.
- Added **Twilio** and SendGrid integrations with queue based throttling, protecting vendor rate limits and avoiding 3 outages.
- Designed **MySQL** schemas and **REST APIs** that handled 50,000+ alerts per day with 99.9% delivery success.

Education

Bachelor of Science in Computer Science

University of North Texas | 2014 - 2018

CoreSkills

Languages: JavaScript, TypeScript, Python, SQL, Go, HTML

Frontend: React, Next.js, Redux, GraphQL, Tailwind CSS, Storybook

Backend: Node.js, Express, NestJS, Django, FastAPI, REST APIs

Data and Cloud: PostgreSQL, MySQL, Redis, AWS, Docker, Kubernetes, Terraform

Quality and Delivery: Jest, Cypress, Playwright, GitHub Actions, CI/CD
